

i500 inverters

0.33 ... 175 hp (0.25 ... 132 kW)

Lenze

Lenze makes many things easy for you.

With our motivated and committed approach, we work together with you to create the best possible solution and set your ideas in motion - whether you are looking to optimise an existing machine or develop a new one. We always strive to make things easy and seek perfection therein. This is anchored in our thinking, in our services and in every detail of our products. It's as easy as that!

On principle: Always perfect: the new i500

The i500 is ideal for numerous applications: travelling drives, conveyor drives, shaper drives, pumps and fans, tool drives, hoist drives and winding drives.

Less means more!

Focused on the essentials: the new i500

i500 is the new inverter series - a streamlined design, scalable functionality and exceptional user-friendliness.

Smaller unnecessary elements

- High scalability in terms of the mains voltage range, rated power and modular structure
- Supports all current networks
- Diagnostics via keypad, USB or WLAN

Greater cost savings

- Optimised solution for individual customer requirements
- Flexibility

Smaller Size

- Compact size: Up to 15 hp (11 kW), only 5.12 in (130 mm) deep and, up to 3 hp (2.2 kW), only 2.36 (60 mm) in wide
- Side-by-side installation: can be mounted adjacent to each other

Greater space in the control cabinet

- Provides solutions in limited spaces
- Smaller control cabinets reduce costs

Smaller engineering expenditure

- Intuitively logical structure of parameters
- Easy controller integration

Greater time for what really matters

- Saves time in engineering
- Reduction in potential error sources

Smaller installation expenses

- Keyhole mounting
- Plug-in terminals up to 3 hp (2.2 kW)
- Out-of-the box operability. Simply connect, start, go!
- Plug-in memory module

Greater productivity

- Saves time during installation
- Fewer faults in use
- Lower costs in the event of a service

Smaller energy consumption

- Fewer inverter losses thanks to the use of cutting-edge technologies
- Energy-efficient

Greater sustainability

- Best efficiency values, lowest energy costs
- Future-proof thanks to DIN EN 50598

Smaller downtime

- Robust single board design
- Entire device produced by Lenze

Greater reliability

- Lower quality assurance costs in manufacture
- Reduces operational guarantee costs

Functionality

i500 provides a high-quality frequency inverter that already conforms to future standard in accordance with the EN 50598-2 efficiency classes (IE). Overall, this provides a reliable and future-proof drive for a wide range of machine applications.

Scalability

Easily scaled, the right i500 can be customised to suit the application. Here, “scaled” refers to two optimised products: the i510 as the basic design with predefined modes and the high-capacity modular i550 for a variety of applications. Which is the right one for you? See the following table:

	i510	i550

Inverter i550; connection to 480 V mains supply

Certain i550 480 V inverters can be operated with two load characteristics. Heavy Duty: For requirements with high overload behaviour. Light Duty: For requirements with low-level overload behaviour.

i510 or i550:
delivery as complete inverter

If the same inverter is always inserted into the machine, the inverter can be ordered "out of the box". i5x0 is the designation for both products; these products can be ordered in the power range of up to 3 hp (2.2 kW).

i550: delivery as components

If different product versions are required in the machine, the various components can be ordered individually. Depending on the application, the components can be plugged together easily and without any further tools.
