# HMI Designer

## Integrated HMI Development Environment

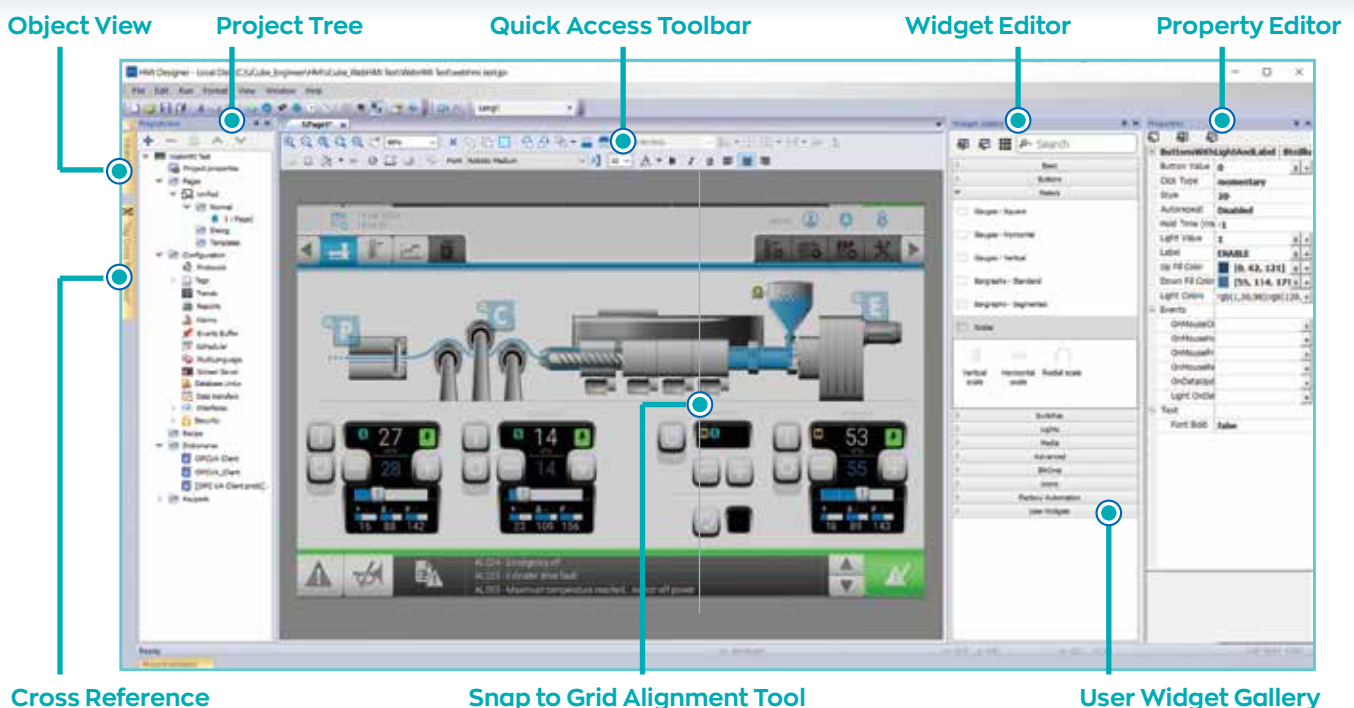

### FEATURES

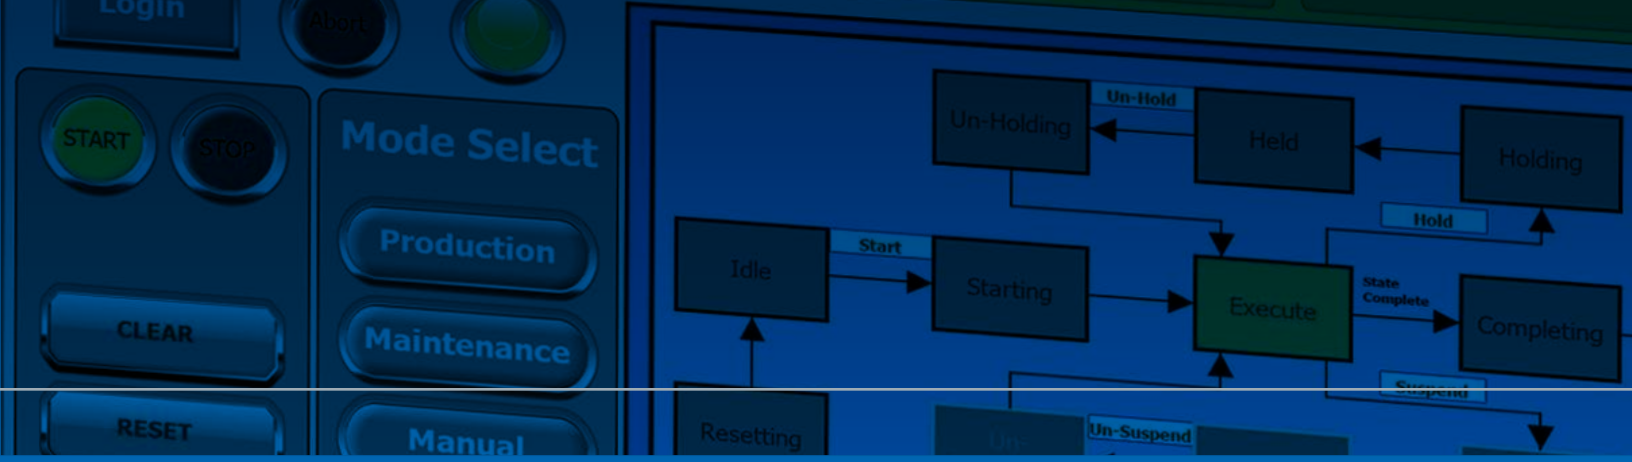

- 200+ drivers (HMI can act as a protocol converter)
- Recipe Manager
- Alarm Handling
- JavaScript
- Trending
- Datalogging
- Project simulation
- OPC UA online browsing
- OPC UA tags synchronize with iCube Engineer projects
- Projects on Yaskawa panels
- Projects on PC's

- Modbus/TCP tag import from Motionworks IEC project

HMI Designer is an HMI development environment that is included with iCube Engineer at no additional cost.

It is available as a stand-alone version also for use with MPiec products using the Modbus/TCP driver.

Projects can run on smartPanels, PanelPCs, PCs, iC9200, or HTML5 web panels and iCube Engineer OPC UA tags will synchronize with the HMI project.

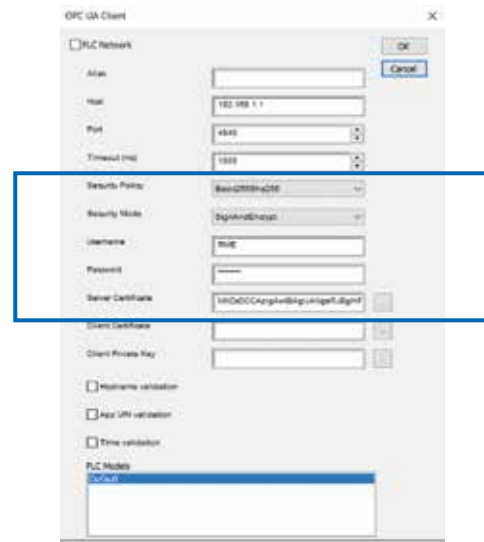

## HMI DESIGNER COMMUNICATION

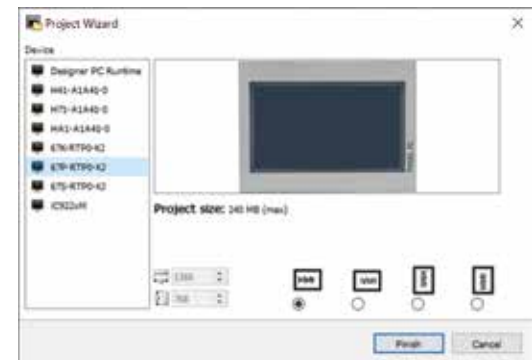

- OPC UA is the preferred communications protocol
- HMI is the Client
- Controller is the Server
- Security settings are available
- User data types are transferred to the HMI project
- Structures, arrays, etc., don't need to be broken down by the user
