## MOTION CONTROL DRIVES

# SINAMICS S200 Servo drive system

[siemens.com/d37-1](https://www.siemens.com/d37-1)

Dear Customer,

We are pleased to present you with the new edition of the Catalog D 37.1 · November 2023.

The catalog provides a comprehensive overview of the SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, a SIMOTICS S-1FL2 servomotor and a matching MOTION-CONNECT connection system.

In addition to updates and technical adjustments, the new edition of the catalog has mainly been expanded to include the Pulse Train Input version (PTI) of the SINAMICS S200 servo converters.

The products listed in this catalog are also included in SiePortal.  
Please contact your local Siemens office for additional information.

Up-to-date information about SINAMICS S200 is available online at  
[www.siemens.com/sinamics-s200](https://www.siemens.com/sinamics-s200)

You can access SiePortal online at  
<https://sieportal.siemens.com>

Your personal contact is keen to receive your suggestions and recommendations for improvement. You can find your contact in our contact database at  
[www.siemens.com/automation-contact](https://www.siemens.com/automation-contact)

We hope that you will often enjoy using Catalog D 37.1 · November 2023 as a selection and ordering reference document and wish you every success with our products and solutions.

With kind regards,

Frank Golüke  
Vice President  
General Motion Control  
Siemens AG, Digital Industries, Motion Control

# Digitalization in drive technology

## From the digital world to the real world

[siemens.com/digital-drives](https://www.siemens.com/digital-drives)

### *Increase your transparency and productivity by digitalizing your drive technology*

Many drives are used in the manufacturing and process industries. They produce lots of data anyway – why not use them to increase the availability and productivity of machines and plants?

Drive technology offers the ideal entry point into the world of digitalization – for plant and machine builders as well as for users.

The digitalization portfolio for the drive train spans over the complete life cycle – from the design phase to realization and optimization – in the digital and the real world.

Our portfolio contains drive simulation solutions and efficient engineering tools, comprehensive connectivity that allows drives to be easily linked to the relevant platforms as well as smart analytics (e.g. cloud and edge apps) and drive system services.

These solutions enable you to gain a better understanding of processes, states and utilization. The health status of the drive train can be monitored and analyzing drive data enables an early detection of anomalies and reduces downtimes. This way, availability and productivity of machines and plants can be increased and the actual maintenance demand can be identified. Furthermore, data-based business models and service offerings are facilitated.

### *Our digitalization portfolio covers all phases of the life cycle: from the design phase to realization and optimization. It covers the digital and the real drive train.*

**Design:** By creating a digital twin of the drives, machine builders can shorten their time-to-market since they can design, simulate and optimize their machine before ordering any material or products. Together with other tools from the engineering box, simulation can also speed up the engineering phase of drives and entire machines, for example by virtual commissioning of the PLC.

**Realize:** Once the machine is in operation, the drives can be connected to other platforms, for example to the cloud and Industrial Edge. This creates transparency in terms of what is going on inside the drive train, e.g. with regard to the actual current, torque and speed.

**Optimize:** To understand the collected data, our drive train analytics portfolio provides algorithms and analysis tools to unlock the potential of the data and turn the gained transparency into insights and valuable knowledge. These insights can then again be used in the design phase of the next life cycle, thus closing the loop.

## Benefits of drive train digitalization

### Machine builders

#### Availability

Increase the availability of your machines

#### Speed

Shorten time-to-market

#### Business models

Develop new service and business models

### Machine operators

#### Productivity

Increase the productivity of your production

#### Flexibility

Increase the flexibility of your production

#### Efficiency

Identify potential for optimization

### Benefits for machine and plant builders

- Increased availability of machines and plants – thanks to digital options for checking and implementing design improvements and comprehensive monitoring of drive systems
- Shorter time-to-market and faster development times – thanks to practical software tools and a continuous database for concurrent development processes as well as virtual simulations, tests, and commissioning of machines and plants
- New options for future service and business models – ranging from customized application solutions and digital services to contractually guaranteed availabilities of machines and plants

### Benefits for machine and plant operators

- Increased availability and productivity of production, fewer unscheduled downtimes – through the early detection of deviations and emerging risks thanks to digital drive monitoring
- More flexible production down to batch size 1 – through more effective use of knowledge from existing production lines thanks to transparent utilization, states, locations, and capacities down to the drive level
- Identification of potential for optimization to make production faster, better, and more efficient thanks to data-based transparency – for example, for faster modifications, simpler quality control, and the early prediction of maintenance demand as well as demand-oriented maintenance

# TIA Selection Tool – quick, easy, smart configuration

For you to get the most out of our portfolio quickly and easily.

Do you always need the optimum configuration for planning your project?

For your application we offer the TIA Selection Tool to support all project planners, beginners and experts alike.

No detailed portfolio knowledge is necessary.

TIA Selection Tool is available for download as a free desktop version or a cloud variant.

## Your Advantages

### Quick

- Configure a complete project with just a few entries – without a manual, without special knowledge
- Import and export of hardware configuration to TIA Portal or other systems
- Ideal visualization of the projects to be configured

### Easy

- Tool download either as desktop version or web-based cloud version
- Technically always up-to-date about product portfolio and innovative approaches
- Highly flexible, secure, cross-team work in the cloud
- Direct ordering in SiePortal

### Smart

- Smart selection wizard for error-free configuration and ordering
- Configuration options can be tested and simulated in advance
- Library for archiving sample configurations

The TIA Selection Tool is a completely paperless solution.

# Sustainability @Siemens

Transforming the everyday to create a better tomorrow.

- Decarbonization**
- Ethics**
- Governance**
- Resource Efficiency**
- Equity**
- Employability**

For more information, see [www.siemens.com/sustainability-figures](http://www.siemens.com/sustainability-figures)

As a company, Siemens considers environmental, social and governance (ESG) criteria from all angles with its DEGREE framework (decarbonization, ethics, governance, resource efficiency, equity and employability). We are not only committed to reducing the carbon footprint in our own operations to net zero by 2030, but also helping our customers achieve their decarbonization and sustainability goals.

## Mission & strategy

As a focused technology company, Siemens is committed to addressing the world's most profound challenges by leveraging the synergies between digitalization and sustainability.

## Technology with aim and purpose

We develop technologies that connect the real and digital worlds and enable our customers to positively transform the industries that form the backbone of our economy: industry, infrastructure, transportation and healthcare.

## Our contribution

Siemens makes an impact every day by providing innovative solutions in response to challenges relating to environmental protection, decarbonization, health and safety. Innovative solutions that have a clear goal: to make the world more sustainable, more integrative and a better place to live.

## Sustainability facts

For almost 175 years, Siemens has been driven by the desire to improve the lives of people around the world with our technologies.

# System overview

## The SINAMICS converter family

### Overview

#### Integration in automation

#### Totally Integrated Automation and communication

SINAMICS is an integral component of the Siemens "Totally Integrated Automation" concept. Integrated SINAMICS systems covering configuration, data storage, and communication at automation level ensure low-maintenance solutions with the SIMATIC, SIMOTION and SINUMERIK control systems.

Depending on the application, the appropriate variable frequency drives can be selected and incorporated in the automation concept. With this in mind, the drives are clearly subdivided into their different applications. A wide range of communication options (depending on the drive type) are available for establishing a communication link to the automation system:

- PROFINET
- PROFIBUS
- EtherNet/IP
- Modbus TCP
- Modbus RTU
- AS-Interface
- BACnet MS/TP

#### Applications

SINAMICS is the comprehensive converter family from Siemens designed for machine and plant engineering applications. SINAMICS offers solutions for all drive tasks:

- Simple pump and fan applications in the process industry
- Demanding single drives in centrifuges, presses, extruders, elevators, as well as conveyor and transport systems
- Drive line-ups in textile, plastic film, and paper machines as well as in rolling mill plants
- Highly dynamic servo drives for machine tools, as well as packaging and printing machines

## Overview

**SINAMICS as part of the Siemens modular automation system****Innovative, energy-efficient and reliable drive systems and applications as well as services for the entire drive train**

The solutions for drive technology place great emphasis on the highest productivity, energy efficiency and reliability for all torque ranges, performance and voltage classes.

Siemens offers not only the right innovative variable frequency drive for every drive application, but also a wide range of energy-efficient low voltage motors, geared motors, explosion-protected motors and high-voltage motors for combination with SINAMICS.

Furthermore, Siemens supports its customers with global pre-sales and after-sales services, with over 295 service points in 130 countries – and with special services e.g. application consulting or motion control solutions.

**Energy efficiency**Energy management process

Efficient energy management consultancy identifies the energy flows, determines the potential for making savings and implements them with focused activities.

Almost two thirds of the industrial power requirement is from electric motors. This makes it all the more important to use drive technology permitting energy consumption to be reduced effectively even in the configuration phase, and consequently to optimize plant availability and process stability. With SINAMICS, Siemens offers powerful energy efficient solutions which, depending on the application, enable a significant reduction in electricity costs.

## System overview

1

### The SINAMICS converter family

#### Overview

##### Up to 70 % potential for savings using variable speed operation

SINAMICS enables great potential for savings to be realized by controlling the motor speed. In particular, huge potential savings can be recovered from pumps, fans and compressors which are operated with mechanical throttle and valves. Here, changing to variable-speed drives brings enormous economic advantages. In contrast to mechanical control systems, the power consumption at partial load operation is always immediately adjusted to the demand at that time. So energy is no longer wasted, permitting savings of up to 60 % – in exceptional cases even up to 70 %. Variable-speed drives also offer clear advantages over mechanical control systems when it comes to maintenance and repair. Current spikes when starting up the motor and strong torque surges become things of the past – and the same goes for pressure waves in pipelines, cavitation or vibrations which cause sustainable damage to the plant. Smooth starting and ramp-down relieve the load on the mechanical system, ensuring a significantly longer service life of the entire drive train.

##### Regenerative feedback of braking energy

In conventional drive systems, the energy produced during braking is converted to heat using braking resistors. Energy produced during braking is efficiently recovered to the supply system by versions of SINAMICS G and SINAMICS S drives with regenerative feedback capability and these devices do not therefore need a braking resistor. This permits up to 60 % of the energy requirement to be saved, e.g. in lifting applications. Energy which can be reused at other locations on a machine. Furthermore, this reduced power loss simplifies the cooling of the system, enabling a more compact design.

##### Energy transparency in all configuration phases

Early on, in the configuration phase, the SIZER for Siemens Drives engineering tool (integrated into TIA Selection Tool) provides information on the specific energy requirement. The energy consumption across the entire drive train is visualized and compared with different plant concepts.

##### SINAMICS in combination with energy-saving motors

Engineering integration stretches beyond the SINAMICS converter family to higher-level automation systems, and to a broad spectrum of energy-efficient motors with a wide range of performance classes, which, compared to previous motors, are able to demonstrate up to 10 % greater efficiency.

#### Variants

Depending on the application, the SINAMICS range offers the ideal variant for any drive task.

Overview

Platform concept

All SINAMICS variants are based on a platform concept. Joint hardware and software components, as well as standardized tools for dimensioning, configuration, and commissioning tasks ensure high-level integration across all components. SINAMICS handles a wide variety of drive tasks with no system gaps. The different SINAMICS variants can be easily combined with each other.

Quality management according to EN ISO 9001

SINAMICS conforms to the most exacting quality requirements. Comprehensive quality assurance measures in all development and production processes ensure a consistently high level of quality.

Of course, our quality management system is certified by an independent authority in accordance with EN ISO 9001.

Integrated system configuration

Siemens offers perfectly matched drive components with which you can meet your requirements. The drive components reveal their true strengths over the full range from engineering and commissioning through to operation: Integrated system configuration is performed using the Siemens Product Configurator: Just select a motor and a converter and design them with the SIZER for Siemens Drives engineering tool (integrated into TIA Selection Tool). The STARTER and SINAMICS Startdrive commissioning tools integrate the motor data and at the same time simplify efficient commissioning. All drive components are incorporated in the TIA Portal – this simplifies engineering, commissioning and diagnostics.

#### Using the SINAMICS selection guide

The varying range of demands on modern variable frequency drives requires a large number of different types. Selecting the optimum drive has become a significantly more complex process. The application matrix shown simplifies this selection process considerably, by suggesting the ideal SINAMICS drive for examples of typical applications and requirements.

- The application type is selected from the vertical column
  - Pumping, ventilating, compressing
  - Moving
  - Processing
  - Machining
- The quality of the motion type is selected from the horizontal row
  - Basic
  - Medium
  - High

## Overview

### SINAMICS S200 servo drive system

Example: SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, 200 ... 240 V 1 AC / 3 AC, PROFINET, frame size FSB, a SIMOTICS S-1FL2 servomotor, shaft height 30, metal hybrid connector, outlet direction drive end (DE) and MOTION-CONNECT 350 dual cables for power and communication

The SINAMICS S200 servo drive system is a single axis AC/AC servo drive system with compact design, high dynamic performance, ease of use and high reliability for motion control applications in standard servo motion market. It comprises SINAMICS S200 servo converters, SIMOTICS S-1FL2 servomotors, MOTION-CONNECT 350 and 380 connection systems and engineering tools.

### System components

#### SINAMICS S200 servo converters

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

#### SIMOTICS S-1FL2 servomotors

With flexible encoder options, including absolute encoder 17-bit singleturn, 21-bit singleturn and 21-bit singleturn + 12-bit multiturn, the system provides precise and accurate performance. The encoders can be used without a battery, making it easy to operate and maintenance.

- Low Inertia for high dynamic performance
- Medium Inertia for dynamic and smooth operational performance
- High Inertia for smooth operational performance

#### MOTION-CONNECT 350 and 380 connection systems

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

# System overview

## SINAMICS S200 servo drive system

### Benefits

#### **Performance-optimized**

##### Dynamic

Ideal for dynamic applications thanks to:

- fast current controllers
- 8 kHz PWM frequency

##### Fast

The system enables seamless communication to controllers via PROFINET IRT, providing fast and efficient data exchange and control.

##### Overload capacity

SIMOTICS S-1FL2 servomotors providing up to 350 % overload capacity, can handle sudden increases in load without compromising performance or efficiency, ensuring uninterrupted operation and increased productivity.

##### Compact

To enable more efficient use of cabinet space and improve application system design, both servo converters and servomotors are further optimized in compactness thanks to their high power density. More important, for side-by-side installation, SINAMICS S200 servo converters require only 1 mm for 200 V series and 10 mm for 400 V series.

#### **Easy to use**

##### Easy setup

All frame sizes of SINAMICS S200 servo converters have an integrated holding brake control <sup>1)</sup>, which does not require connection to an external relay, and the integrated brake resistor to dissipate the regenerative power for fast braking, which is easy and cost effective for applications.

##### Easy engineering.

With directly integrated into SINAMICS Startdrive, and the embedded SINAMICS web server for SINAMICS S200, variety of user-friendly features make the servo drive system easy for engineering. Additionally, advanced One Button Tuning (OBT) enables machines to achieve a high dynamic performance within just seconds.

##### Easy implementation

The system is designed to meet global standards and certifications, including CE, UKCA, UL, RCM, EAC, KC and SEMI47, ensuring compliance with safety and quality regulations worldwide.

#### **Fit for future**

##### Digital engineering journey

Unlock potential with a seamless digital engineering journey, from selection and commissioning to diagnosis via TIA Selection Tool, Siemens Product Configurator and TIA Portal. More important, SINAMICS S200 servo drive system can be simulated with SINAMICS DriveSim Basic.

##### Scalable system

As a scalable system, users can get a seamless integrated motion control system together with SIMATIC controllers (e.g. SIMATIC S7-1500).

##### Safety & Security

The system includes a safety concept that features Safety Integrated Basic Function Safe Torque Off (STO), ensuring safe and reliable operation. You achieve defense in depth thanks to User Management and Access Control (UMAC) providing always active industrial security service.

<sup>1)</sup> Not available for SINAMICS S200 Basic servo converters.

## Application

## Application examples

### Integration

- ① Controller (for example SIMATIC S7-1500)
- ② Communication between the converter and the controller via setpoint cable
- ③ SINAMICS S200 converter product line (PTI version)
- ④ Engineering via LAN with the web server in the converter
- ⑤ MOTION-CONNECT 350 or MOTION-CONNECT 380 cables for connecting motor, motor holding brake and encoder
- ⑥ SIMOTICS S-1FL2 servomotor

System topology SINAMICS S200 servo drive system, Pulse Train Input version (PTI)

### SINAMICS S200 servo drive system

#### Configuration

The following electronic configuring aids and engineering tools are available for the SINAMICS S200 servo drive system:

##### **SINAMICS DriveSim Basic (firmware V6.2 or higher)**

SINAMICS DriveSim Basic provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

More information is provided on the internet at:  
[www.siemens.com/drive-virtualization](http://www.siemens.com/drive-virtualization)

You can find more information on SINAMICS DriveSim Basic in the Engineering tools section.

##### **SINAMICS SELECTOR app (available soon)**

Mobile selection guide for frequency converters

Siemens has developed the SINAMICS SELECTOR app as a practical tool for finding article numbers for your SINAMICS converters in a power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220 (available soon), SINAMICS S200 (available soon) or SINAMICS S210: the app will provide you with the correct article numbers conveniently.

How does it work?

Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. Your preselection is the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:  
[www.siemens.com/sinamics-selector](http://www.siemens.com/sinamics-selector)

##### **Siemens Product Configurator**

The Siemens Product Configurator helps you configure the optimum drive technology products for a number of applications – starting with gearboxes, motors, converters as well as the associated options and components and ending with controllers, software licenses and connection systems.

The Siemens Product Configurator can be used on the internet without requiring any installation. The Siemens Product Configurator can be found in SiePortal at the following address:  
[www.siemens.com/spc](http://www.siemens.com/spc)

You can find more information on the Siemens Product Configurator in the Engineering tools section.

##### **Drive dimensioning of the SINAMICS S200 servo drive system with the TIA Selection Tool**

The SINAMICS S200 servo drive system is easily configured with the TIA Selection Tool under the Drive Dimensioning plug-in. It provides support when selecting the hardware and firmware components necessary to implement a drive task. The plug-in encompasses the configuration of the entire drive system and allows the handling of individual drives.

- Intuitive user interface, menu-based operation and help
- Configuration of the SINAMICS S200 servo drive system
- Adjustable traversing cycles and various mechanical systems integrated for single-axis applications
- Interface to the TIA Portal and SiePortal

The TIA Selection Tool is available for free on the internet at  
[www.siemens.com/tia-selection-tool-standalone](http://www.siemens.com/tia-selection-tool-standalone)

You can find more information on the TIA Selection Tool in the Engineering tools section.

##### **SINAMICS web server for SINAMICS S200**

The converter can be brought easily and quickly into operation and optimized with the web server. Additional software does not need to be installed as access comes directly from a web browser.

You can find more information about the SINAMICS web server for SINAMICS S200 in the Engineering tools section.

##### **SINAMICS Startdrive commissioning tool (TIA Portal)**

SINAMICS Startdrive is a tool for configuring, commissioning, and diagnosing the SINAMICS converter family and is integrated into TIA Portal (V18 SP2 or higher).

The SINAMICS Startdrive has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. SINAMICS firmware V6.2 or higher is required for SINAMICS S200.

The SINAMICS Startdrive Advanced license is required for the Safety Integrated acceptance test.

The SINAMICS Startdrive commissioning tool is available for free on the internet at:  
[www.siemens.com/startdrive](http://www.siemens.com/startdrive)

You can find more information on the SINAMICS Startdrive commissioning tool in the Engineering tools section.

## Technical specifications

### General technical specifications

	SINAMICS S200 servo drive system		
	Low Inertia for high dynamic performance 200 V ... 240 V 1 AC / 3 AC	Medium Inertia for dynamic and smooth operational performance 200 V ... 240 V 1 AC / 3 AC or 380 V ... 480 V 3 AC	High Inertia for smooth operational performance 380 V ... 480 V 3 AC
<b>SINAMICS S200 Basic servo converters</b>			
Line voltage and power range	• 200 V ... 240 V 1 AC / 3 AC (–15 % / +10 %), 0.1 kW ... 1 kW	• 200 V ... 240 V 1 AC / 3 AC (–15 % / +10 %), 0.1 kW ... 1 kW	–
Communication	• Pulse train input position control (PTI) for Pulse Train Input version (PTI): pulse train position control (Fast PTI) • PROFINET RT/IRT (PN) for PROFINET version (PN): speed control, torque control, basic positioner control (EPos)		–
Inputs and outputs	• Pulse Train Input version (PTI): 6 DI, 4 DO • PROFINET version: 4 DI (incl. 2 fast DI), 1 DO		–
Frame sizes	• FSA, FSB, FSC		–
Safety Integrated Basic Functions	–		–
Holding brake control	• External relay and power supply required		–
Degree of protection	• IP20		–
<b>SINAMICS S200 servo converters</b>			
Line voltage and power range	• 200 V ... 240 V 1 AC / 3 AC (–15 % / +10 %), 0.1 kW ... 1 kW	• 200 V ... 240 V 1 AC / 3 AC (–15 % / +10 %), 0.1 kW ... 1 kW • 380 V ... 480 V 3 AC (–15 % / +10 %), 0.2 kW ... 1.5 kW	• 380 V ... 480 V 3 AC (–15 % / +10 %), 0.4 kW ... 7 kW
Communication	• Pulse train input position control (PTI) for Pulse Train Input version (PTI): pulse train position control (Fast PTI), speed control, torque control • PROFINET RT/IRT (PN) for PROFINET version (PN): speed control, torque control, basic positioner control (EPos)		
Inputs and outputs	• Pulse Train Input version (PTI): 10 DI (incl. 2 fast DI), 6 DO, 2 AI, 2 AO • PROFINET version: 4 DI (incl. 2 fast DI), 2 DO		
Frame sizes	• FSA, FSB, FSC		• FSA, FSB, FSC, FSD
Safety Integrated Basic Functions	• Safe Torque Off (STO)		
Degree of protection	• IP20		
Holding brake control	• Integrated holding brake control		
<b>SIMOTICS S-1FL2 servomotors</b>			
Shaft height	• 20, 30, 40, 52	• 30, 40, 48	• 45, 65, 90
Rated torque	• 0.16 ... 6.60 Nm (0.12 ... 4.87 lbf-ft)	• 0.64 ... 4.60 Nm (0.47 ... 3.39 lbf-ft)	• 1.27 ... 33.40 Nm (0.94 ... 24.63 lbf-ft)
Rated power	• 0.05 ... 2.1 kW	• 0.2 ... 1.45 kW	• 0.4 ... 7 kW
Rated speed	• 3000 r/min		• 3000 r/min for shaft height 45 • 2000 r/min for shaft heights 65, 90
Max. speed	• 6500 r/min for shaft heights 20, 30, 40 • 6000 r/min for shaft height 52	• 6500 r/min for shaft heights 30, 40 • 6000 r/min for shaft height 48	• 4000 r/min for shaft height 45 • 3000 r/min for shaft height 65 • 2000 r/min, 2500 r/min or 3000 r/min for shaft height 90
Encoder	• Absolute encoder 17-bit singleturn • Absolute encoder 21-bit singleturn • Absolute encoder 21-bit singleturn + 12-bit multeturn		
Degree of protection	• IP54 for shaft heights 20, 30, 40 Optional: IP65 • IP65, natural cooling, with shaft sealing ring for shaft height 52	• IP54 for shaft heights 30, 40 Optional: IP65 • IP65, natural cooling, with shaft sealing ring for shaft height 48	• IP65, natural cooling, with shaft sealing ring

**Recommended SIMATIC S7 controller**

More information about SIMATIC S7-1500 and SIMATIC S7-1500 T-CPU controllers is available in Catalog ST 70 and on the internet at:

[www.siemens.com/simatic-s7-1500](http://www.siemens.com/simatic-s7-1500)

**Spare parts for SINAMICS S200 Basic and SINAMICS S200 servo converters**

Description	Article No.
<b>Shield connection kit</b> including several shield plates and fixing screws	<b>6SL5566-0AB00-0AA0</b>
<b>Terminal kits</b> • for SINAMICS S200 • for SINAMICS S200 Basic	<b>6SL5568-0XX00-0AA0</b> <b>6SL5668-0XX00-0AA0</b>
<b>Replacement fans</b> • for SINAMICS S200, 400 V version, FSC • for SINAMICS S200, 400 V version, FSD	<b>6SL5560-0CE00-0AA0</b> <b>6SL5560-0DE00-0AA0</b>

**Starter kit (available soon)**

Description	Article No.
<b>SINAMICS S200 PN starter kit</b> Scope of delivery: • SINAMICS S200 servo converter, PROFINET version, 200 V, 400 W • SIMOTICS S-1FL2 Low Inertia servomotor, shaft height 30, 400 W, IP65 degree of protection, without holding brake, shaft with feather key, with absolute encoder 21-bit singleturn • Pre-assembled dual motor connection cable, drive end, 3 m (9.84 ft) • Pre-assembled PROFINET I/O cable, 1 m (3.28 ft) The delivery quantity is limited to three units per customer.	<b>6SL5990-0AE50-0AA0</b>

**Training case**

Description	Article No.
<b>SINAMICS S200 training case</b> Scope of delivery: • 2 × SINAMICS S200 servo converter, PROFINET version, 200 V, 100 W • 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn • 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn • 2 × Pre-assembled dual motor connection cable • Rail, prepared for installation of a controller, e.g. SIMATIC S7-1500 (controller not included in scope of delivery) The SINAMICS S200 training case is supplied as a trolley with a hood.	<b>6AG1067-1AA42-0AA0</b>

## More information

**Identification link according to IEC 61406 for SINAMICS S200**

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right. With their globally unique identifiers, Siemens products are ready for Industry 4.0.

<sup>1)</sup> Available soon.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s200/documentation](http://www.siemens.com/sinamics-s200/documentation)

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s200/configuration](http://www.siemens.com/sinamics-s200/configuration)

					125 KB	CPU 1215C DC/DC/DC	<b>6ES7215-1AG40-0XB0</b>
				4 (1 MHz)	150 KB	CPU 1217C DC/DC/DC	<b>6ES7217-1AG40-0XB0</b>

One SIMATIC S7-1200 CPU can control up to 4 SINAMICS S200 axes. Each axis requires 2 high-speed digital outputs for the pulse train interface. The SIMATIC S7-1500 compact CPUs can also be connected to SINAMICS S200 via "pulse train".

#### Expansion for control of more than 2 axes

Signal boards, 0.1 A, 200 kHz, can be plugged directly into the CPU. One axis requires 2 high-speed digital outputs for controlling.

Digital outputs	Input voltage	Type	Article No.
2	5 V DC	SB 1223	<b>6ES7223-3AD30-0XB0</b>
	24 V DC		<b>6ES7223-3BD30-0XB0</b>
4	5 V DC	SB 1222	<b>6ES7222-1AD30-0XB0</b>
	24 V DC		<b>6ES7222-1BD30-0XB0</b>

For SINAMICS S200 PROFINET (PN) version, the AC/DC/RLY and DC/DC/RLY versions of SIMATIC S7-1200 are also possible (CPU 1211C, CPU 1212C, CPU 1214C and CPU 1215C).

SINAMICS S200 as a PROFINET I/O device with PROFIdrive supports technology objects and function blocks of SIMATIC S7-1200, SIMATIC S7-1500 and SIMATIC S7-1500 Technology CPU for speed and positioning control.

For further information about SIMATIC controllers please refer to Catalog ST 70 or to web page:

## SINAMICS S200 servo converters

### SINAMICS S200 Basic servo converters

#### Overview

##### *SINAMICS S200 Basic servo converters*

SINAMICS S200 Basic servo converters, 200 ... 240 V 1 AC / 3 AC, Pulse Train Input version (PTI), frame sizes FSA, FSB and FSC

SINAMICS S200 Basic servo converters, 200 ... 240 V 1 AC / 3 AC, PROFINET version, frame sizes FSA, FSB and FSC

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

# SINAMICS S200 servo converters

## SINAMICS S200 Basic servo converters

### Technical specifications

Line voltage 200 ... 240 V 1 / 3 AC		SINAMICS S200 Basic servo converters, Pulse Train Input version (PTI)				
		6SL5610-1BB10-1AA0	6SL5610-1BB10-2AA0	6SL5610-1BB10-4AA0	6SL5610-1BB10-8AA0	6SL5610-1BB11-0AA0
		SINAMICS S200 Basic servo converters, PROFINET version				
		6SL5610-1BB10-1AF0	6SL5610-1BB10-2AF0	6SL5610-1BB10-4AF0	6SL5610-1BB10-8AF0	6SL5610-1BB11-0AF0
<b>Line supply connection</b>		200 ... 240 V -10 % ... +15 % 1 / 3 AC				
• Supply voltage	Hz	50/60 ±10 %				
• Line frequency	mm <sup>2</sup>	2.5				
• Conductor cross-section, max.		Grounded TN/TT networks and ungrounded IT networks				
• Line system configuration		Depending on the motor-converter combination and the planned installation height, boundary conditions must be observed with regard to the line connection. For more information, see the operating instructions on the Internet at: <a href="http://www.siemens.com/sinamics-s200/documentation">www.siemens.com/sinamics-s200/documentation</a>				
<b>Rated current</b>						
• 1 AC	A	1.2	2.0	3.0	8.0	8.0
• 3 AC	A	0.6	1.1	1.8	4.0	4.0
<b>Inrush current</b>	A	10.5	10.5	8.5	7.6	7.6
<b>Power loss</b>	W	12	15	24	45	46
<b>Maximum permissible short-circuit current (SCCR)</b>	kA	100				
<b>Electronic power supply</b>		24 V -15 % ... +20 %				
• Voltage		1.2 A without brake, 2.2 A with brake				
• Power requirement, max.	mm <sup>2</sup>	2.5				
• Conductor cross-section, max.						
<b>Output</b>						
• Rated power 230 V	kW	0.1	0.2	0.4	0.75	1.0
• Rated current	A	0.8	1.3	2.4	4.4	4.4
• Output current, max.	A	3.3	5.1	9.2	16.8	16.8
<b>Overload capability</b>		350 %				
<b>Pulse frequency power unit</b>	kHz	8				
<b>Output frequency</b>	Hz	0 ... 550				
<b>Line filter</b>		Category C2 (up to 30 m (98.5 ft) motor cable length), <a href="#">see accessories/line filter</a>				
<b>Braking resistor</b>		Without			Integrated	
<b>Digital inputs <sup>1)</sup></b>						
• Fast digital inputs		-				
- Pulse Train Input version (PTI)		-				
- PROFINET version		2				
• General digital inputs		6				
- Pulse Train Input version (PTI)		2				
- PROFINET version		2				
• Low level		-30 V ... +5 V and ≤2 mA				
• High level		15 V ... 30 V				
• Current consumption, max.	mA	4				
• Delay time, typ., L → H		5 μs (for fast digital inputs) or 10 μs (for general digital inputs)				
• Delay time, typ., H → L		5 μs (for fast digital inputs) or 150 μs (for general digital inputs)				
• Galvanic isolation		No (for fast digital inputs) or Yes (for general digital inputs)				
• Conductor cross-section, max.	mm <sup>2</sup>	1.5				
<b>Digital outputs <sup>1)</sup></b>						
- Pulse Train Input version (PTI)		4				
- PROFINET version		1				
• Load current per digital output, max.	mA	100				
• Delay time	ms	< 2				
• Conductor cross-section, max.	mm <sup>2</sup>	1.5				
<b>Analog inputs</b>						
- Pulse Train Input version (PTI)		-				
- PROFINET version		-				
<b>Analog outputs</b>						
- Pulse Train Input version (PTI)		-				
- PROFINET version		-				
<b>Frame Size</b>		FSA	FSA	FSB	FSC	FSC
<b>Cooling</b>		Convection (without fan)				
<b>Dimensions</b>						
• Width	mm (in)	40 (1.57)	40 (1.57)	40 (1.57)	60 (2.36)	60 (2.36)
• Height	mm (in)	170 (6.69)	170 (6.69)	170 (6.69)	170 (6.69)	170 (6.69)
• Depth	mm (in)	135 (5.31)	135 (5.31)	170 (6.69)	195 (7.68)	195 (7.68)
<b>Weight, approx.</b>	kg (lb)	0.9 (1.98)	0.9 (1.98)	1.1 (2.43)	1.8 (3.97)	1.8 (3.97)

<sup>1)</sup> The specified delay times refer to the hardware. The actual reaction time depends on the time slot in which the digital input or digital output is processed.

**Technical specifications**

#### More information

##### **Identification link according to IEC 61406 for SINAMICS S200**

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s200/documentation](http://www.siemens.com/sinamics-s200/documentation)

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s200/configuration](http://www.siemens.com/sinamics-s200/configuration)

### Overview

#### SINAMICS S200 servo converters

SINAMICS S200 servo converters, 200 ... 240 V 1 AC / 3 AC, Pulse Train Input version (PTI), frame sizes FSA, FSB and FSC

SINAMICS S200 servo converters, 380 ... 480 V 3 AC, Pulse Train Input version (PTI), frame sizes FSA, FSB, FSC and FSD

SINAMICS S200 servo converters, 200 ... 240 V 1 AC / 3 AC, PROFINET version, frame sizes FSA, FSB and FSC

SINAMICS S200 servo converters, 380 ... 480 V 3 AC, PROFINET version, frame sizes FSA, FSB, FSC and FSD

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and works perfectly together with SIMATIC controllers.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

SINAMICS S200 servo converters, FSA to FSD, 400 V 3 AC, IP20

### More information

#### Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:  
[www.siemens.com/sinamics-s200/documentation](http://www.siemens.com/sinamics-s200/documentation)

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:  
[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s200/configuration](http://www.siemens.com/sinamics-s200/configuration)

# SINAMICS S200 servo converters

## Line-side components

### Line filters

#### Overview

Example: Line filter for SINAMICS S200

It is recommended to use a line filter to protect the system from high frequency noise.

With one of the recommended line filters, IEC 61800-3 category C2 can be reached in combination with SINAMICS S200 for motor cable lengths up to 30 m (98.5 ft).

#### Selection and ordering data

### More information

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:  
[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

and is also available via the Siemens Product Configurator on the internet.  
 The Siemens Product Configurator can be found in SiePortal at the following address:  
[www.siemens.com/sinamics-s200/configuration](http://www.siemens.com/sinamics-s200/configuration)

## SINAMICS S200 servo converters

### Line-side components

#### Recommended line-side overcurrent protection devices

##### Overview

Overcurrent protection devices are necessary for the operation of the converters. The following table lists recommendations for fuses.

- Siemens fuses of type 3NA3 and 3NW6 for use in the area of validity of IEC
- UL-listed fuses Class J for use in USA and Canada

Recommendations on further overcurrent protection devices are available at:

- For SINAMICS S200 and SINAMICS S200 Basic  
[www.siemens.com/sinamics-s200/ocpd](http://www.siemens.com/sinamics-s200/ocpd)

The Short Circuit Current Rating (SCCR) according to UL for industrial control cabinet installations to NEC Article 409 or UL 508A/508C or UL 61800-5-1 is as follows for Class J fuses for

- SINAMICS S200 and SINAMICS S200 Basic at 240 V 1 AC / 3 AC: 100 kA
- SINAMICS S200 at 480 V 3 AC: 65 kA

SCCR and ICC values for combination with further overcurrent protection devices are available at:

- For SINAMICS S200 and SINAMICS S200 Basic  
[www.siemens.com/sinamics-s200/ocpd](http://www.siemens.com/sinamics-s200/ocpd)

Notes for installations in Canada:

The converters are intended for line supply systems with overvoltage category III.

More information is available in the technical documentation on the internet at:

[www.siemens.com/sinamics-s200/documentation](http://www.siemens.com/sinamics-s200/documentation)

Additional information about the listed Siemens fuses is available in Catalog LV 10 as well as in SiePortal.

**Overview**

If the internal braking resistor cannot meet the braking requirements, an external resistor must be used, which converts the regenerative electrical energy into heat and thus provides significantly improved braking and deceleration capabilities.

When selecting a braking resistor, factors such as load inertia, deceleration time, speed change and braking duration must be taken into account according to the specific application and technology.

Further information is available in the technical documentation on the Internet at:  
[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

### Overview

Sample memory card SINAMICS SD card

The parameter assignment, firmware and licenses for a converter can be stored on the SINAMICS SD memory card. When service is required, e.g. after the converter has been replaced and the data have been downloaded from the memory card the drive system is immediately ready for use again.

The memory card has the following functions:

- Parameter settings can be written from the memory card to the converter or saved from the converter to the memory card
- The memory card supports series commissioning without the use of a commissioning tool
- If firmware is stored on the memory card, the firmware can be upgraded/downgraded during startup

#### Notes:

In general, the converter can be operated without a memory card. However, it is necessary if licenses, such as the Extended Safety license, are required. The card must then remain permanently inserted.

## SIMOTICS S-1FL2 servomotors for SINAMICS S200

### Overview

SIMOTICS S-1FL2 Low Inertia servomotors, shaft heights 20, 30, 40 and 52

SIMOTICS S-1FL2 Medium Inertia servomotors, shaft heights 30, 40 and 48

SIMOTICS S-1FL2 High Inertia servomotors, shaft heights 45, 65 and 90

The SIMOTICS S-1FL2 servomotors are compact and highly dynamic synchronous motors for a wide range of uses in an industrial environment. They are characterized by high power density, degree of protection and overload capability.

The 1FL2 servomotors are perfectly suited to overcome the essential challenges in servo drive technology. The product range includes a limited number of variants and options and therefore enables a simple overview and selection. They form the core of the servomotors for the SINAMICS S200 servo drive system.

#### **SIMOTICS S-1FL2 Low Inertia motors**

Highest dynamic response through low inertia for highly dynamic applications with low moved masses.

#### **SIMOTICS S-1FL2 Medium Inertia motors**

Precise, stable control with medium masses to be moved with medium moment of inertia.

#### **SIMOTICS S-1FL2 High Inertia motors**

Precise, stable control with high masses to be moved with high moment of inertia.

### Benefits

The SIMOTICS S-1FL2 servomotors fully exploit their strengths in the system with the SINAMICS S200 converter:

- Short adjustment and positioning times
- Quick and precise compensation of disturbances
- Stable closed loop control with high dynamic response

This is achieved by:

- Rapid control cycle
- High pulse frequency
- Complex rule algorithms
- High-resolution optical encoder with fast scanning
- Low moment of inertia of the motors
- High overload capability

### Application

- Packaging machines
- Handling equipment
- Feed and withdrawal devices
- Stacking units
- Automatic assembly machines
- Laboratory automation
- Woodworking, glass and ceramic industries

## Selection and ordering data

# SIMOTICS S-1FL2 servomotors for SINAMICS S200

## Technical specifications

### General technical specifications

SIMOTICS S-1FL2 motors – Low Inertia/Medium Inertia/High Inertia	
<b>Motor type</b>	Permanent-magnet synchronous motor
<b>Permissible operating conditions</b>	
<ul style="list-style-type: none"> <li>Ambient temperature</li> </ul>	-15 ... +40 °C (5 ... 104 °F) without derating -15 ... +60 °C (5 ... 140 °F) with derating For more derating information, see operating instructions online at: <a href="http://www.siemens.com/sinamics-s200/documentation">www.siemens.com/sinamics-s200/documentation</a>
<ul style="list-style-type: none"> <li>Installation altitude, max.</li> </ul>	1000 m (3281 ft) without derating > 1000 m ... 5000 m (> 3281 ft ... 16405 ft) with derating For more derating information, see operating instructions online at: <a href="http://www.siemens.com/sinamics-s200/documentation">www.siemens.com/sinamics-s200/documentation</a>
<b>Relative humidity</b>	90% at 30 °C (86 °F) (no condensation)
<b>Degree of protection</b>	
According to EN 60034-5 (IEC 60034-5) <ul style="list-style-type: none"> <li>1FL2102, 1FL2.03, 1FL2104 and 1FL2204</li> </ul>	IP54 for the shaft extension (without shaft sealing ring) and IP65 for the motor body, optionally IP65 for the whole motor (with shaft sealing ring)
<ul style="list-style-type: none"> <li>1FL2.05 and 1FL23..</li> </ul>	IP65 (with shaft sealing ring)
<b>Cooling</b>	Natural cooling (IC410)
According to EN 60034-6	
<b>Type of construction</b>	IM B5 (IM V1, IM V3)
According to EN 60034-7 (IEC 60034-7)	
<b>Shaft extension</b>	Plain shaft
According to DIN 748-3 (IEC 60072-1)	Optional shaft with feather key (half-key balancing)
<b>Shaft and flange accuracy</b>	Tolerance N
According to DIN 42955 (IEC 60072-1)	In each case for radial eccentricity of the shaft extension, concentricity of the centering ring, and axial eccentricity of the mounting flange to the axis of the shaft extension.
<b>Vibration severity grade</b>	Grade A
According to EN 60034-14 (IEC 60034-14)	is maintained up to rated speed
<b>Stator winding insulation</b>	
According to EN 60034-1 (IEC 60034-1) <ul style="list-style-type: none"> <li>1FL2102, 1FL2.03 and 1FL23..</li> </ul>	Thermal class 130 (B) for a winding overtemperature of $\Delta T = 80$ K
<ul style="list-style-type: none"> <li>1FL2104, 1FL2204, 1FL2105 and 1FL2205</li> </ul>	Thermal class 155 (F) for a winding overtemperature of $\Delta T = 100$ K
<b>Sound pressure level <math>L_{pA}</math> (1 m), max.</b>	
According to ISO 1680 <ul style="list-style-type: none"> <li>1FL2102, 1FL2.03, 1FL2104 and 1FL2204</li> </ul>	60 dB(A) +3 dB(A) tolerance
<ul style="list-style-type: none"> <li>1FL2.05 and 1FL2304</li> </ul>	65 dB(A) +3 dB(A) tolerance
<ul style="list-style-type: none"> <li>1FL2306 and 1FL2310</li> </ul>	70 dB(A) +3 dB(A) tolerance
<b>Encoder system</b>	<ul style="list-style-type: none"> <li>Absolute encoder 17-bit singleturn</li> <li>Absolute encoder 21-bit singleturn</li> <li>Absolute encoder 21-bit singleturn + 12-bit multiturn</li> </ul>
<b>Holding brake</b>	Optional integrated holding brake
<b>Connection</b>	
<ul style="list-style-type: none"> <li>1FL2102, 1FL2.03, 1FL2104 and 1FL2204</li> </ul>	Double line with a metal hybrid connector
<ul style="list-style-type: none"> <li>1FL2.05</li> </ul>	Two cable connections with two metal circular connectors
<ul style="list-style-type: none"> <li>1FL23..</li> </ul>	Three cable connections with three metal circular connectors
<b>Paint finish</b>	RAL 7016 (anthracite gray)
<b>Certificates of suitability</b>	CE, UKCA, cURus, EAC

## Technical specifications

### Regulations, standards, specifications

The motors comply with the appropriate standards and regulations, see table below.

As a result of the fact that in many countries the national regulations have been completely harmonized with the international IEC 60034-1 recommendation, there are no longer any differences with respect to coolant temperatures, temperature classes and temperature rise limits.

General specifications for rotating electrical machines	IEC 60034-1
Terminal designations and direction of rotation for electrical machines	IEC 60034-8
Types of construction of rotating electrical machines	IEC 60034-7
Cooling methods of rotating electrical machines	IEC 60034-6
Degrees of protection of rotating electrical machines	IEC 60034-5
Vibration severity of rotating electrical machines	IEC 60034-14
Noise limit values for rotating electrical machines	IEC 60034-9
Cylindrical shaft extensions for electrical machines	DIN 748-3/IEC 60072-1

SIMOTICS S-1FL2 motors have UL approval from Underwriters Laboratories Inc. and are marked with the "UL Recognized Component" test symbol.

This is used for components which are part of a larger product or system. This confirmed compliance with the corresponding US American and Canadian regulations, and allowed access to the North American market.

For SIMOTICS S-1FL2 motors, conformity with the relevant EC Directives 2006/95/EC and 2014/35/EU and the relevant standards

EN 60034-1:2010, EN 60204-1:2006 is confirmed. By applying the CE mark to the product, Siemens AG confirms this for the product, and secures the free movement of goods within the European Union..

The UKCA (UK Conformity Assessed) marking is a new product marking that will be used for products being placed on the market in Great Britain (England, Wales and Scotland). It covers most products which previously required a CE marking.

The UKCA marking is mandatory for deliveries to the UK starting January 1, 2023.

The marking is typically applied to motors with a second nameplate bearing the UKCA label.

### Degree of protection acc. to IEC 60034-5

A suitable degree of protection must be selected according to the operating and environmental conditions to protect the motor against damage caused by the ingress of water and other liquids, as well as dust and foreign bodies.

SIMOTICS S-1FL2 motors in the 1FL2102, 1FL2.03, 1FL2104 and 1FL2204 versions are produced with the IP54 degree of protection as standard (no shaft sealing ring) and in IP65 for the motor body, optionally in IP65 for the entire motor (with shaft sealing ring).

SIMOTICS S-1FL2 motors in the 1FL2.05 and 1FL23.. versions are produced as standard with a radial shaft seal ring in degree of protection IP65. This increases the protection against the ingress of liquids.

The degree of protection designation is composed from the code IP (for International Protection) and two code numbers for the protection against touching and penetration of foreign bodies, and the degree of protection against the ingress of water.

#### First code number

6: Protection against dust ingress and complete protection against touching

#### Second code number

4: Protection against splashwater from any direction

5: Protection against jet water from any direction

#### Recommended degrees of protection for three-phase motors

When cooling lubricants are used, protection against water alone is inadequate. The IP rating should only be considered as a guide value in this case. The motors may have to be protected by suitable covers. Attention must be paid to providing suitable sealing of the motor shaft for the selected degree of protection for the motor.

The following table can serve as a decision aid for selecting the proper degree of protection for motors. A permanent covering of liquid on the flange must be avoided when the motor is mounted with the shaft extension facing upwards (IM V3).

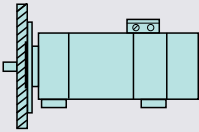

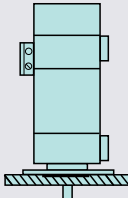

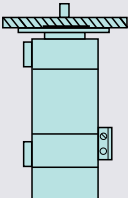

Effect	General workshop environment	Water/ general cooling lubricant (95 % water, 5 % oil)
Dry	IP64	-
Humid/moist environment	-	IP64
Mis	-	IP65
Spraying water	-	IP65

## Technical specifications

### Type of construction, mounting position according to IEC 60034-7

SIMOTICS S-1FL2 motors are designed in type of construction IM B5. They may also be used in mounting positions IM V1 and IM V3.

Code 1	IM B5	IM V1	IM V3
Code 2	IM 3001	IM 3011	IM 3031
			
	Horizontal flange mounting	Flange mounting, output shaft pointing vertically downwards	Flange mounting, output shaft pointing vertically upwards

### Shaft and flange accuracy in accordance with IEC 60072-1

Radial eccentricity tolerance of shaft in relation to housing axis (referred to cylindrical shaft extensions)

Motor	Shaft extension D × L mm (in)	Radial eccentricity tolerance N µm
1FL2102	8 × 25 (0.31 × 0.98)	30
1FL2.03	14 × 30 (0.55 × 1.18)	35
1FL2104	19 × 40 (0.75 × 1.57)	40
1FL2204		
1FL2105	19 × 45 (0.75 × 1.77)	
1FL2205	19 × 40 (0.75 × 1.57)	
1FL2304	19 × 35 (0.75 × 1.38)	
1FL2306	22 × 58 (0.87 × 2.28)	
1FL2310	35 × 80 (1.38 × 3.15)	50

Concentricity and axial eccentricity tolerance of the flange surface for the shaft axis

(referred to the centering diameter of the mounting flange)

Motor	Centering diameter mm (in)	Concentricity and axial eccentricity Tolerance N µm
1FL2102	30 (1.18)	60
1FL2.03	50 (1.97)	80
1FL2104	70 (2.76)	
1FL2204		
1FL2105	95 (3.74)	
1FL2205	80 (3.15)	
1FL2304	80 (3.15)	
1FL2306	110 (4.33)	100
1FL2310	114.3 (4.50)	

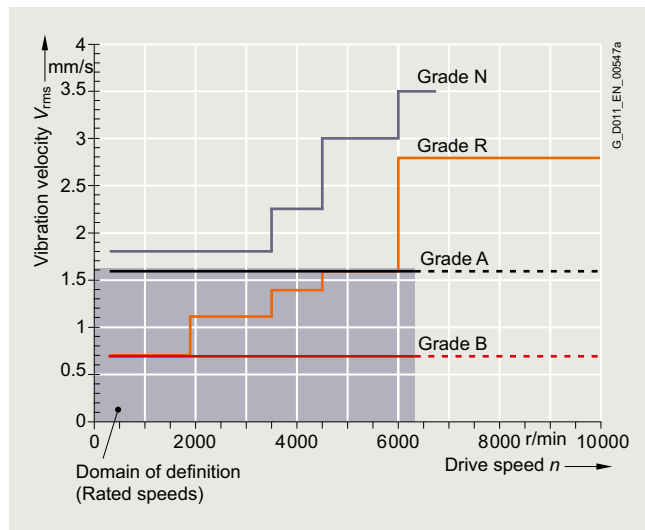

## Technical specifications

### Vibration severity and vibration severity grade A according to IEC 60034-14

The vibration severity is the RMS value of the vibration velocity (frequency range from 10 Hz to 2000 Hz). The vibration severity is measured using electrical measuring devices according to DIN 45666.

The specified values refer only to the motor. These values can increase as a result of the overall system vibrational behavior due to installation.

Vibration severity limit values

The speeds of 1800 r/min and 3600 r/min and the associated limit values are specified according to IEC 60034-14.

The speeds of 4500 r/min and 6000 r/min and the specified values are defined by the motor manufacturer.

The motors maintain vibration severity grade A up to the rated speed.

### Balancing according to ISO 21940-32

Apart from the balance quality of the motor, the vibrational quality of motors with attached belt pulleys is mainly determined by the balance state of the mounted component. If the motor and the mounted component are balanced separately before being joined, the balancing process of the belt pulley is to be adapted to the motor's balancing type.

SIMOTICS S-1FL2 motors with feather keys are always half-key balanced. In general, motors with a plain shaft are recommended for systems with the most stringent vibrational quality requirements.

### Vibration stress, immitted vibration values

The requirements of environmental class 3M8 (according to EN 60721-3-3 Table 6) must be maintained for proper function and safeguard the bearing life. The following limits are valid for (immitted) vibration values introduced into the motor from outside:

- For Low Inertia and Medium Inertia:
  - Vibration velocity  $V_{rms}$  according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
  - Vibration acceleration  $a_{peak}$  axial and radial 50 m/s<sup>2</sup> (164 ft/s<sup>2</sup>)
- For High Inertia:
  - Vibration velocity  $V_{rms}$  according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
  - Vibration acceleration  $a_{peak}$  axial 25 m/s<sup>2</sup> (82 ft/s<sup>2</sup>) and  $a_{peak}$  radial 50 m/s<sup>2</sup> (164 ft/s<sup>2</sup>)

During transport, the motors withstand single shocks (6 ms) of up to 250 m/s<sup>2</sup> (820 ft/s<sup>2</sup>).

### Ambient temperature and installation altitude

Operating range without restrictions:

Temperature range from -15 °C to +40 °C (5 °F to 104 °F), installation altitude up to 1000 m (3281 ft).

If deviating conditions are encountered, the S1 characteristic of the motor must be adapted with regard to speed and torque.

Use the following equation to calculate the reduced S1 characteristic:

$$S1_{red}(n) = x_D \times S1_{40\text{ °C}(104\text{ °F}); 1000\text{ m}(3281\text{ ft})}(n/x_D)$$

Installation altitude above sea level m (ft)	Derating factor $x_D$ at an ambient temperature of			
	30 °C (86 °F)	40 °C (104 °F)	45 °C (113 °F)	50 °C (122 °F)
1000 (3281)	1.08	1.00	0.96	0.91
2000 (6562)	1.02	0.93	0.89	0.84
3000 (9843)	0.95	0.86	0.81	0.75
4000 (13124)	0.88	0.77	0.72	0.66
5000 (16405)	0.80	0.68	0.62	0.55

### Encoder systems

#### Singleturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. In contrast to the multiturn absolute encoder, it does not have a revolution counter, and can therefore only supply the position value within one revolution. It does not have a traversing range.

#### Multiturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. It can also count 4096 revolutions. So with a ball screw, for example, the absolute position of the slide can be determined over a longer distance.

14th position in the Article No. of the motor	Designation
1FL2 .....-H..	Absolute encoder 17-bit singleturn (resolution 131072)
1FL2 .....-S..	Absolute encoder 21-bit singleturn (resolution 2097152)
1FL2 .....-M..	Absolute encoder 21-bit singleturn + 12-bit multiturn (resolution 2097152, traversing range 4096 revolutions)

## SIMOTICS S-1FL2 servomotors for SINAMICS S200

### Technical specifications

#### Holding brake

Many drives need a holding brake with an EMERGENCY STOP function for safety reasons or to meet process requirements. The brakes used on SIMOTICS S-1FL2 motors operate on the quiescent current principle. A spring or permanent magnet exerts a tensile force on the brake armature disk, i.e. in a state of zero current, the brake is closed and the motor shaft thereby stopped.

An electric current that flows through a coil generates an opposing field that counteracts the force effect of the spring or permanent magnet and releases or holds open the brake. Only a limited number of braking operations can be performed for an EMERGENCY STOP or power failure without causing excessive wear on the holding brake. The holding brake is not an operational brake. Regular dynamic braking leads to increased wear and premature brake failure. In order to ensure the functionality and specification of the brake, neither the total

operating energy nor the maximum switching energy per braking operation may be exceeded.

The brake control is already fully integrated into the SINAMICS S200 converter system, so that an external circuit is not necessary.

After an EMERGENCY STOP sequence with the maximum single switching energy, a cooling time of at least 3 minutes is required.

The following table contains technical specifications of the holding brakes for operating on SINAMICS S200 converters.

Motor	Shaft height	Holding torque	Dynamic braking torque	Opening time	Closing time	Maximum permissible single switching energy	Total operating energy (service life)	Holding current
		Nm (lbf-ft)	Nm (lbf-ft)	ms	ms	J	kJ	A
1FL2102	20	0.32 (0.24)	0.32 (0.24)	35	10	1	2	< 1
1FL2.03	30	1.3 (0.96)	1.3 (0.96)	60	10	10	20	< 1
1FL2104 1FL2204	40	3.3 (2.43)	3.3 (2.43)	100	15	43	86	< 1
1FL2105	52	8 (5.90)	5 (3.69)	90	25	142	284	< 1
1FL2205	48	8 (5.90)	5 (3.69)	90	25	142	284	< 1
1FL2304	45	3.5 (2.58)	3.5 (2.58)	60	45	140	280	< 2
1FL2306	65	12 (8.85)	12 (8.85)	180	60	600	1200	< 2
1FL2310	90	30 (22.1)	30 (22.1)	220	115	1100	2200	< 2

<sup>1)</sup> Typische Werte bei einer Umgebungstemperatur von 20 °C.  
Bei -15 °C können sich die Öffnungsströme um bis zu 30 % erhöhen.

## MOTION-CONNECT connection systems

### MOTION-CONNECT 350 and 380

#### Overview

##### **MOTION-CONNECT 350 and 380 connection systems**

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

The use of pre-assembled MOTION-CONNECT 350/380 cables ensures high quality and system-tested, problem-free operation.

Degree of protection of pre-assembled power and signal cables is IP65 when closed and connected unless otherwise stated.

MOTION-CONNECT 350/380 cables are not suitable for outdoor use.

MOTION-CONNECT 350/380 cables are approved for a maximum horizontal travel distance of 5 m without support.

The cables must be unwound without twisting.

Cables must be installed in accordance with the instructions supplied by the cable carrier manufacturer.

In case of vibration load and with horizontal or vertical cable entries, we recommend that the cable is additionally fixed if between the cable strain relief on the cable carrier and the terminal at the motor part of the cable is hanging loose or is not routed. To prevent machine vibrations being transmitted to the connectors, the cable should be fixed at the moving part where the motor is mounted.

##### **Derating factors for power and signal cables**

Ambient air temperature °C (°F)	Derating factor according to EN 60204-1 Table D.1
30 (86)	1.10
35 (95)	1.05
40 (104)	1.00
45 (113)	0.96
50 (122)	0.90
55 (131)	0.84
60 (140)	0.78

4

To maximize the service life of the cable carrier and cables, cables in the carrier made from different materials must be separated in the cable carrier using spacers. The spacers must be filled evenly to ensure that the position of the cables does not change during operation. The cables should be distributed as symmetrically as possible according to their weights and dimensions. Cables with different outer diameters should be separated by spacers as well.

When inserting pre-assembled cables into the cable carrier, do not pull at the connector, as this may damage the strain relief or cable clamping.

The cables must not be fixed in the cable carrier. They must be freely movable.

The cables must be able to be moved without applying force, specifically in the bending radii of the carrier. The specified minimum bending radii must be adhered to.

The cable fixings must be attached at both ends at an appropriate distance from the end points of the moving parts in a dead zone.

## Overview

Example: MOTION-CONNECT 350/380, dual cable without brake cores for SIMOTICS S-1FL2 Low Inertia/Medium Inertia servomotors

### SINAMICS SELECTOR App

#### Mobile selection guide for frequency converters

Siemens has developed the SINAMICS SELECTOR app as a practical tool for finding article numbers for your SINAMICS converter in the power range from 0.1 kW to 630 kW quickly and easily.

Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220 (available soon), SINAMICS S200 (available soon) or SINAMICS S210:

The app will provide you with the correct article numbers conveniently.

How does it work? Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. The preselection serves as the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:

#### Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept.

Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit

[www.siemens.com/cybersecurity-industry](http://www.siemens.com/cybersecurity-industry)

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>

## Engineering tools

### SINAMICS DriveSim Basic

#### Overview

SINAMICS DriveSim Basic provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

The models are validated and tested against real SINAMICS converters and are available in the form of a standardized FMU (Functional Mockup Unit). Therefore, they are compatible with various standard time-based simulation programs such as SIMIT, Simcenter Amesim, ANSYS Twin Builder, MATLAB Simulink or Hopsan.

SINAMICS DriveSim Basic is another element in your engineering toolbox. Together with other virtual Siemens solutions, e.g. SIMATIC S7-PLCSIM Advanced or NX Mechatronics Concept Designer, a consistent model-based development process can be implemented.

#### Benefit

- Speed up time-to-market for OEMs
- Test validated SINAMICS models under real conditions already at the design or planning stage and make needed adjustments
- Identify issues and improvement capabilities early in the design stage and reduce testing effort to save time and cost
- Download is free of charge. The ideal entry point for drive system simulation
- Valid for the most commonly used Siemens drives

Advantages of SINAMICS DriveSim Basic compared to SIMIT PROFIdrive blocks:

- Increased level of detail due to speed controller, current setpoint filters and internal load model
- Identical parameter values and meaning as in the real SINAMICS device
- Direct reference to SINAMICS documentation
- Validated against the real SINAMICS drive
- No wiring effort to represent functional configurations
- Significant reduction of SIMIT simulation tags (even more is possible if unused in-/ outputs are deselected within the Component Type Editor (CTE))
- Enables simulation of an (internal) two-mass oscillator as application with realistic SINAMICS parameter settings, besides the known limitations by the minimum sample time in SIMIT
- Compatible with every FMU Co-Simulation 2.0 compatible simulation

#### Application

With SINAMICS DriveSim Basic, you can implement three major use cases:

- Providing load characteristics for drive selection and dimensioning
- Virtual commission your PLC already in the design phase
- Test and improve interaction between PLC, drives and application virtually

#### **Use case 1: Providing load profiles for drive sizing**

If you are designing a machine, you want to make sure that you select the SINAMICS converter and SIMOTICS motor most suitable for your drive application. As SINAMICS DriveSim Basic is control-unit-agnostic and thus represents a generic drive, you can parametrize it according to the functionality of your application. Running the simulation results in load characteristics, i.e. torque or speed curves over time. You can import these load profiles into TIA Selection Tool to select the suitable Control Unit and dimension the drive to best fit to the demand. So as a result you have well selected SINAMICS converters and SIMOTICS motors with the help of the digital twin.

#### **Use case 2: Virtual commission your PLC already in the design phase**

If you are designing a machine, you want to make sure the PLC code works with your SINAMICS drive. After writing the PLC code in TIA Portal, you can connect it via PLCSIM Advanced to any time-based simulation tool (e.g. SIMIT). Integrated into the simulation tool, SINAMICS DriveSim Basic acts as a realistic communication partner for the PLC. Next, you can commission the virtual PLC in TIA Portal as you would do with a real PLC connected to a real drive. Without simulation, you would need to do that on-site. With simulation, you not only save time, but also have the freedom to try out various configurations and optimize your PLC code early in the process.

#### **Use case 3: Test and improve interaction between PLC, drives and application virtually**

With the third Use case, you can connect a simulation tool such as NX Mechatronic Concept Designer to visualize the mechanical movements of your application. This way, you ensure that the drive behaves according to the desired machine performance. You can test several fault scenarios and optimize the interaction between PLC, application and drive virtually so overall, you can avoid unplanned machine behavior and increase the performance of your setup.

## Integration

SINAMICS DriveSim Basic can be run in tools that support FMU 2.0 Co-Simulation Import (<https://fmi-standard.org/tools/>).

The FMU has been tested in the following simulation environments and is available in the attached application examples.

Tool	Manufacturer	DriveSimBasic*** Variante	PLC Sim Advanced interface	Notes
SIMIT	Siemens	***.fmu	Yes	<ul style="list-style-type: none"> <li>Permissible configuration: ExternalLoad = 1 &amp; . SpeedController = 0 or ExternalLoad = 0 &amp; . SpeedController = 1</li> <li>Simulation with external load can provide wrong results because the minimum possible time step is 1 ms</li> </ul>
Simcenter Amesim	Siemens	***_double.fmu	Yes	
MATLAB Simulink	MathWorks	< 2019a ***_unstruct.fmu ≥ 2019a ***.fmu	Yes	
ANSYS Twin Builder	ANSYS	***.fmu	No	
Hopsan	Linköping University	***_double.fmu	No	<ul style="list-style-type: none"> <li>Open Source</li> <li>Install "win64-with_compiler-installer.exe" package</li> </ul>

### Siemens Product Configurator

#### Overview

The Siemens Product Configurator helps you to configure the optimum drive technology products for a number of applications. The product portfolio comprises the full drive technology range of gearbox, motor, converter and connection system as well as corresponding controller with suitable software license. The intuitive user interface in conjunction with product-specific preliminary selectors makes it simple, fast and efficient to configure products. The result is a bill of materials with extensive documentation consisting of technical data sheets, motor characteristic curves, 2D dimensional drawings / 3D CAD models, EPLAN macros and much more. You can order the products directly by transferring the bill of materials to the shopping cart of SiePortal.

#### **Siemens Product Configurator at a glance**

- Quick and easy configuration of drive products and associated components – gearboxes, motors, converters, controllers, connection systems
- Extensive documentation for all products and components, such as
  - Data sheets in up to 12 languages
  - Motor characteristic curves
  - 2D dimensional drawings / 3D CAD models in different formats
  - Terminal box drawing and terminal connection diagram
  - Certificates
  - EPLAN macros
- Ability to order products directly through SiePortal

#### Access to the Siemens Product Configurator

The Siemens Product Configurator can be accessed without the need for registration or logging in:  
[www.siemens.com/spc](http://www.siemens.com/spc)

## Overview

### Selection guide and configurator for automation technology

Error-free configuration without expert knowledge through intelligent configurators and selection wizards. Desktop and cloud versions enable cross-team collaboration with maximum flexibility.

There are two versions of the TIA Selection Tool:

- One for downloading and execution on Microsoft Windows PCs (from Microsoft Windows 10)
- One for running from the cloud, which is launched from mobile devices directly in the browser (we recommend Safari, Chrome and Firefox)

Projects stored in the cloud can be edited with both tools. This makes it possible to work on-the-go using a tablet, at home on a PC – and vice versa, or together with colleagues and customers.

In order to use the full functionality, we recommended setting up a SiePortal account for both cases. This gives you access to prices and enables you to save your projects to our cloud.

You can find additional information about the TIA Selection Tool at:

[www.siemens.com/tia-selection-tool](http://www.siemens.com/tia-selection-tool)

### Drive dimensioning in the TIA Selection Tool

Application-specific requirements can be determined using drive technology dimensioning in the TIA Selection Tool. This can include motors, gearboxes and converters. The tool supports the configuration and dimensioning of control functions with an open and closed control loop. The technical documentation with features of the technical drive system, as well as a product list for ordering via SiePortal can also be compiled.

You can find more information on the SIZER for Siemens Drives engineering tool at

<https://support.industry.siemens.com/cs/ww/en/ps/13434/dl>

## Engineering tools

### SINAMICS web server for SINAMICS S200

#### Overview

**Web server for efficient commissioning, diagnostics, maintenance and operator control and monitoring, any time, from anywhere**

Web server for efficient commissioning, diagnostics, maintenance and operator control and monitoring, any time, from anywhere

Thanks to the web server, the SINAMICS S200 drive system offers an efficient commissioning, diagnostics, maintenance option as well as operation and monitoring functions. The user is supported by a help function and additional links to specific product information, downloads, FAQs and manuals.

The web server provides access to a multi-faceted range of new options for commissioning or parameter assignment, drive diagnostics, remote maintenance as well as operator control and monitoring for any networked PC with a web browser or for tablets and smartphones (via a separate WLAN access point, such as SINAMICS Smart Adapter<sup>1)</sup>).

The following provides an insight into the functionality offered.

The start screen offers a quick overview of the state of the drive

- Drive type, connected motor as well as the article number and installed firmware
- Important drive parameters show the operating state (can be configured)
- The connection overview provides information about the status of the connections (operating unit - converter - motor)
- Overview of all pending fault and warning messages

The screenshot shows the start screen of the SINAMICS S200 NP web server. It features a sidebar with navigation icons and a main content area with several panels:

- Drive information:** Lists motor details such as Motor type (TLE2 synchronous motor), Rated power (0.40 kW), and Rated current (2.50 Arms).
- Connection overview:** Shows the status of the Operating unit (188.244.11.30) and Motor (188.244.11.22).
- Current messages:** Displays a green checkmark and the message "Currently, no faults or alarms are active."

Start screen of the web server integrated into SINAMICS S200

#### Commissioning

- The quick commissioning provides information about the current motor/encoder and offers the configuration of limit values and digital inputs
- Optimization of the drive settings using One Button Tuning (OBT)

The screenshot shows the 'Motor' configuration screen. It includes a 'Nameplate data' table with the following values:

Nameplate data	Value	Unit
Rated current	2.4	Arms
Rated speed	3000	rpm
Rated voltage	142	Vrms
Maximum motor speed	6000	rpm
Maximum motor current	8.7	Arms

Below this, there is an 'Optional motor data' table:

Optional motor data	Value	Unit
Rated power	0.4	kW
Rated torque	1.27	Nm
Motor stall current	2.4	Arms
Motor stall torque	1.27	Nm
Motor moment of inertia	0.000015	kgm <sup>2</sup>

Quick commissioning with open dialog showing the set motor data

The screenshot shows the 'One Button Tuning' screen. It includes a 'Dynamic settings' section with radio buttons for 'Conservative', 'Standard' (selected), and 'Dynamic'. Below this is a 'Machine property' section with a checkbox for 'Activate additional increase of dynamics'. At the bottom, there is a table of parameter values:

Parameter name	Current value	Previous value
P gain	0.0186 Normalized	0.0186 Normalized
Integral time	5.01 ms	5.01 ms
Load moment of inertia	0.000000 kgm <sup>2</sup>	0.000000 kgm <sup>2</sup>
Kv factor estimated	21.69 1000 rpm	21.69 1000 rpm
Precontrol system/ing time estimated	0.29 ms	0.29 ms

One Button Tuning (OBT)

<sup>1)</sup> SINAMICS Smart Adapter available soon.

Overview

Operator control and monitoring

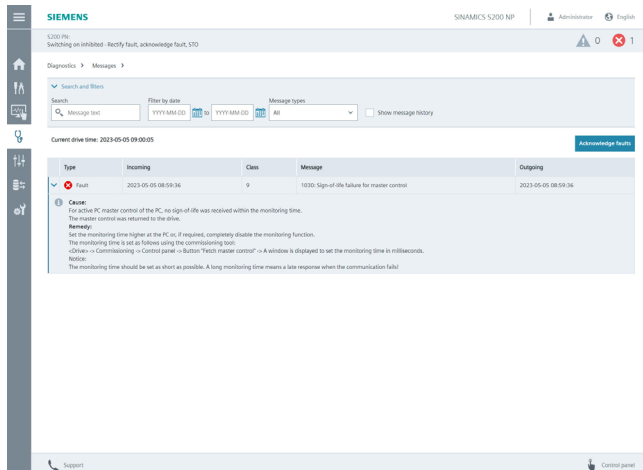

- Configurable drive status with value or trend display
- Status of the digital inputs
- Drive traversing via the control panel, which can be freely positioned on the screen

Operator control and monitoring of the drive with the help of the drive status and control panel

Diagnostics

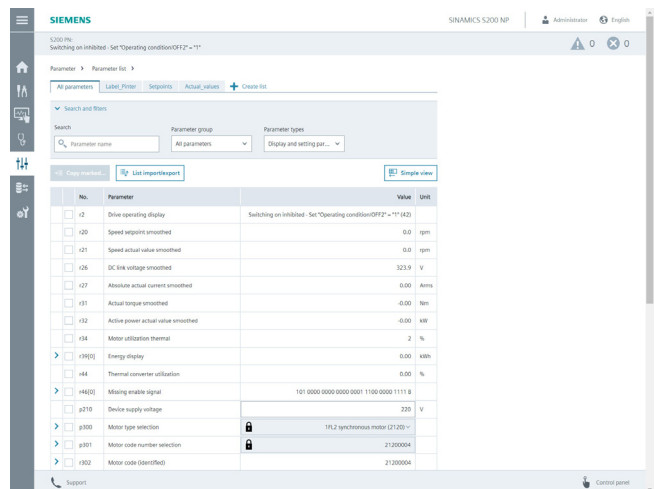

- Evaluation of warnings and fault messages
- Evaluation of system events (diagnostic buffer)
- Analysis of the safety status
- Connection overview, diagnostics of the drive communication and control and status words

Alarm view with convenient search and filter functions

Service and maintenance functions

- Monitor and adjust drive parameters
- Create, import and export user-specific parameter lists
- Back up and restore the drive configuration
- Perform firmware update, also via the network
- Manage software licenses
- Configure basic settings for the drive and web server (e.g. date and time of the drive)
- Configure and manage user accounts and access controls (UMAC)

Parameter list for quick access to drive parameters, also via user-defined parameter lists

## Engineering tools

### SINAMICS web server for SINAMICS S200

#### Overview

##### Support

- Operator support with comprehensive information about the drive and user interface
- Easy access to product information such as FAQs, software downloads, manuals and certificates
- When storing the html documentation on the drive memory card, the user manual can be accessed in a context-sensitive manner from the user interface

#### Benefits

##### Simple and fast commissioning

- Installation of additional commissioning software is not required.
- Tools required for the commissioning are ready to use via the integrated web server.
- Standard pages to set thresholds and onboard inputs
- Simple controller optimization with One Button Tuning (OBT)
- Extensive online help with context-sensitive access to the Operating Instructions (memory card required)

##### Shorter machine downtimes

- Quick overview of the current configuration and the state of the drive
- Efficient diagnostics and maintenance
- Understandable diagnostic information and messages, including the causes of issues and possible remedies, are displayed in plain text in multiple languages
- Context-sensitive help with optional access to the web-based device documentation provides quick help with questions about drive functions

##### Convenient service and maintenance functions

- Quick backup and restoration of the drive data
- Convenient firmware update, also via the network
- Convenient access to drive parameters
- User-defined parameter lists that focus on what matters
- Easy and efficient handling of the parameter list by using search functions and filters (e.g. parameter groups, parameter types)
- Easy exchange with operating personnel by importing/exporting user-defined parameter lists.
- User-defined parameter lists can be exchanged between the SINAMICS Startdrive and the web server.

##### Direct language selection

- English, French, German, Italian, Spanish, Chinese Simplified

##### Accessibility

- Via all LAN or PROFINET interfaces
- Use of mobile devices (e.g. notebooks/tablets and smartphones) via WLAN e.g. with SINAMICS Smart Adapter <sup>1)</sup> or a separate access point
- Access to the web server via PCs/notebooks, SIMATIC HMI (> 10"), smartphones/tablets with a Chromium-based internet browser

##### Access security

- Protection against unauthorized access to the drive functions and data
- Convenient user administration that supports a roles concept
- Easy set-up and management of user accounts

#### Application

The web server is ideal for applications not requiring any special commissioning software or version dependencies. Commissioning, diagnostics and maintenance as well as operator control and monitoring are possible both locally and remotely, provided appropriate security measures are applied.

<sup>1)</sup> SINAMICS Smart Adapter available soon.

Integration

Integration of the SINAMICS web server based on the example of a SINAMICS S200 and the service interface (X127) <sup>1)</sup>

Wireless access to the web server via the service interface (X127) of the SINAMICS S200 with the help of the SINAMICS Smart Adapter <sup>1)</sup>

Access to the web server via the service interface (X127) of the SINAMICS S200 with the help of a USB on-the-go (OTG) Ethernet adapter

Integration of the SINAMICS web server based on the example of a SINAMICS S200 and the PROFINET interface (X150) as connected web client (e.g. PC, SIMATIC HMI etc.) <sup>1)</sup>

<sup>1)</sup> SINAMICS Smart Adapter and SINAMICS SDI Pro 5.5" available soon.

## Engineering tools

### SINAMICS Startdrive commissioning tool

#### Overview

SINAMICS Startdrive is integrated in the TIA Portal and is a tool for the configuration, commissioning and diagnostics of the SINAMICS family of converters.

The SINAMICS Startdrive commissioning tool has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. Time-saving and guided step-by-step commissioning with maximum flexibility is complemented by user-friendly graphic function views for all drive functions, including functional safety (Safety Integrated) and drive-based technology functions (e.g. EPos). The automatic message display, the powerful real-time trace and the context-sensitive online help make converter diagnostics very easy.

The software packages based on the TIA Portal are harmonized with each other and offer important benefits, the main advantage being a shared project storage. The TIA Portal enables simple integration of SINAMICS converters in your automation solution. Thanks to the standardization of operator actions and the integration in general TIA Portal operating concepts (e.g. UMAC, Openness) as well as standard TIA Portal functions (e.g. Undo/Redo), familiarization is easy both for drive experts as well as SIMATIC users. Special focus is placed on the interaction between SIMATIC and SINAMICS, especially when connecting the SINAMICS drives to SIMATIC technology objects.

#### Integration

##### Supported frequency converters

SINAMICS Startdrive Basic enables complete commissioning, diagnostics, parameterization, optimization and connection to the PLC for the following SINAMICS converters integrated in SINAMICS Startdrive:

- SINAMICS G120, G120C, G120D, G120P
- SINAMICS G115D
- SINAMICS G130, G150
- SINAMICS G220 (as of V18 SP2)
- SINAMICS S120 <sup>1)</sup>, S150
- SINAMICS S210 and SINAMICS S210 (New) (as of V18 SP1)
- SINAMICS S200 (as of V18 SP2)
- SINAMICS MV

#### SINAMICS Startdrive Advanced

With SINAMICS Startdrive Advanced (available as of V15) you benefit from powerful engineering functions that save you considerable time and ultimately costs.

- Safety acceptance test:
  - Guided acceptance test wizard for all drive-based Safety Integrated functions
  - Automatic and safety function-specific generation of traces to analyze the machine behavior
  - Generation of an acceptance report as Excel file (xlsx format, can also be used with OpenOffice)
  - Safety Activation Test
- Improved optimization options in the drive: Extended measuring functions (available for CU320-2 PN/DP and CU310-2 PN as of V5.2 SP3, SINAMICS S210 (New) as of V6.1 and SINAMICS S200 as of V6.2), long-term trace
- Also contains all Startdrive Basic functions
- Only license key required, no additional installation

#### New in V19

##### Startdrive Basic V19

- Support of the shared device functionality for SINAMICS S210, S120, G220 for separate control of the drives by separate controllers
- Improvement of the library function for individual drive objects in the multi-axis system
- Integration of the decentralised SINAMICS S120M drives
- Integration of the drive version V6.3 for SINAMICS S200 and SINAMICS S210 (New):
  - Introduction of the positioning function EPos for SINAMICS S210 (New)

##### Startdrive Advanced V19

- Long-term trace functionality for CU320-2 PN/DP and CU310-2 PN-based drive units

<sup>1)</sup> Including SINAMICS S220 Smart Line Modules in booksize format as of SINAMICS Startdrive V17 Update 1.

## Integration

### Installation versions

SINAMICS Startdrive can be installed as an optional package to SIMATIC STEP 7 or as a stand-alone application (without SIMATIC STEP 7).

### System requirements

The following table shows the recommended hardware and system equipment for the operation of SINAMICS Startdrive.

Hardware	Recommendation
<b>Computer</b>	As of SIMATIC FIELD PG M6 Comfort (or comparable PC)
<b>Processor</b>	Intel Core i5-8400H (2.5 ... 4.2 GHz; 4 cores + hyper-threading; 8 MB Smart Cache)
<b>RAM</b>	16 GB or more (32 GB for large projects)
<b>Hard disk</b>	SSD with at least 50 GB available memory
<b>Screen resolution</b>	15.6" Full HD display (1920 × 1080 or larger)
<b>Operating systems</b>	<ul style="list-style-type: none"> <li>• <b>Microsoft Windows 10 (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows 10 Professional Version 22H2</li> <li>- Windows 10 Enterprise 21H2, 22H2</li> <li>- Windows 10 Enterprise 2016 LTSC</li> <li>- Windows 10 Enterprise 2019 LTSC</li> <li>- Windows 10 Enterprise 2021 LTSC</li> </ul> </li> <li>• <b>Microsoft Windows 11 (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows 11 Home Version 21H2, 22H2</li> <li>- Windows 11 Professional Version 21H2, 22H2</li> <li>- Windows 11 Enterprise 21H2, 22H2</li> </ul> </li> <li>• <b>Microsoft Windows Server (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows Server 2016 Standard (full installation)</li> <li>- Windows Server 2019 Standard (full installation)</li> <li>- Windows Server 2022 Standard (full installation)</li> </ul> </li> </ul>

### Compatibility with other products

- SINAMICS Startdrive V19 operates with STEP 7, WinCC and Scout TIA V19 in one framework
- SINAMICS Startdrive V19 can be installed on the same computer in parallel with other versions of SINAMICS Startdrive V12 to V18
- SINAMICS Startdrive can be installed on the same computer as SINAMICS MICROMASTER STARTER

### Supported virtualization platforms

SINAMICS Startdrive can be installed in a virtual machine. For this purpose, one of the following virtualization platforms in the specified version or a newer version can be used:

- VMware vSphere Hypervisor (ESXi) 6.7
- VMware Workstation 15.5.0
- VMware Player 15.5.0
- Microsoft Hyper-V Server 2019

### Supported safety programs

The following safety programs have been tested with SINAMICS Startdrive V19:

- Virus scanners:
  - Symantec Endpoint Protection 14.6
  - Trend Micro OfficeScan 14.0
  - McAfee Endpoint Security (ENS) 10.6 and 10.7
  - Microsoft Defender
  - Qihoo 360 "Safe Guard 12.1" + "Virus Scanner"
- Encryption software:
  - Microsoft Bitlocker
- Host-based Intrusion Detection System
  - McAfee Application Control 8.3.3

**Overview**

**Keep your business running and shaping your digital future – with Industry Services**

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt. Of course, we take care that your production is protected against cyber threats. We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need – safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

[www.siemens.com/industryservices](http://www.siemens.com/industryservices)

## Services and documentation

### Industry Services

#### Industry Services – Portfolio overview

##### Overview

#### Digital Industry Services

Digital Industry Services make your industrial processes transparent to gain improvements in productivity, asset availability, and energy efficiency.

Production data is generated, filtered and translated with intelligent analytics to enhance decision-making.

This is done whilst taking data security into consideration and with continuous protection against cyber-attack threats.

[www.siemens.com/global/en/products/services/industry/digital-industry-services.html](https://www.siemens.com/global/en/products/services/industry/digital-industry-services.html)

#### Training Services

From the basics and advanced to specialist skills, SITRAIN courses provide expertise right from the manufacturer – and encompass the entire spectrum of Siemens products and systems for the industry.

Worldwide, SITRAIN courses are available wherever you need a training course in more than 170 locations in over 60 countries.

<https://support.industry.siemens.com/cs/ww/en/sc/2226>

#### Support and Consulting Services

**Industry Online Support** site for comprehensive information, application examples, FAQs and support requests.

**Technical and Engineering Support** for advice and answers for all inquiries about functionality, handling, and fault clearance. The Service Card as prepaid support for value added services such as Priority Call Back or Extended Support offers the clear advantage of quick and easy purchasing.

**Information & Consulting Services**, e.g. SIMATIC System Audit; clarity about the state and service capability of your automation system or Lifecycle Information Services; transparency on the lifecycle of the products in your plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2235>

#### Spare Parts

Spare Parts Services are available worldwide for smooth and fast supply of spare parts – and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order manage-

ment. Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains – including risk consulting.

**Asset Optimization Services** help you design a strategy for parts supply where your investment and carrying costs are reduced and the risk of obsolescence is avoided.

<https://support.industry.siemens.com/cs/ww/en/sc/2110>

#### Repair Services

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality.

Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

<https://support.industry.siemens.com/cs/ww/en/sc/2154>

#### Field and Maintenance Services

Siemens specialists are available globally to provide expert field and maintenance services, including commissioning, functional testing, preventive maintenance and fault clearance.

All services can be included in customized service agreements with defined reaction times or fixed maintenance intervals.

<https://support.industry.siemens.com/cs/ww/en/sc/2265>

#### Retrofit and Modernization Services

Provide a cost-effective solution for the expansion of entire plants, optimization of systems or upgrading existing products to the latest technology and software, e.g. migration services for automation systems.

Service experts support projects from planning through commissioning and, if desired over the entire extended lifespan, e.g. Retrofit for Integrated Drive Systems for an extended lifetime of your machines and plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2286>

#### Service Programs and Agreements

A technical Service Program or Agreement enables you to easily bundle a wide range of services into a single annual or multi-year agreement.

You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities.

Programs and agreements can be customized as KPI-based and/or performance-based contracts.

## Online Support for Siemens Industry Products

Siemens Industry and Online Support with some 1.7 million visitors per month is one of the most popular web services provided by Siemens. It is the central access point for comprehensive technical know-how about products, systems and services for automation and drives applications as well as for process industries.

In connection with the challenges and opportunities related to digitalization you can look forward to continued support with innovative offerings.

## Services and documentation

### Training

#### SITRAIN – Digital Industry Academy

#### Introduction

SITRAIN – DIGITAL INDUSTRY ACADEMY  
**The Future of Learning starts now**

SITRAIN - Digital Industry Academy stands for a modern learning culture that focuses on the needs of learners and the demands of innovative companies.

SITRAIN offers a comprehensive range of knowledge on Siemens industrial products and, under the vision "Future of Learning", pursues a holistic approach that combines different forms and methods of learning. Different learning formats allow for more effective, flexible and continuous learning depending on the type of learning.

#### Education and training directly from the manufacturer

##### Industrial Automation Systems SIMATIC

Training available for: SIMATIC S7-1500, TIA Portal, SIMATIC S7-300/400, SIMATIC S7-1200

##### Drive Technology

Training available for: SINAMICS S120 and SINAMICS G120 low-voltage converters, SINAMICS G130 / G150 / G180 / S150

##### SINUMERIK CNC automation system

Training available for: SINUMERIK 840D, SINUMERIK 840D sl and SINUMERIK ONE

##### Process Control Systems

Training available for: SIMATIC PCS 7, SIMATIC PCS neo

##### Digital Enterprise

Training available for: Openness, SIMIT, OPC UA, Industrial Edge, Virtual commissioning

##### Industrial Communications

Training available for: PROFINET, SCALANCE, RUGGEDOM, Industrial Ethernet, Fieldbus communication, Industrial Security, Remote communication

##### Identification and Locating

Training available for: RFID, RTLS-Systems

##### Operator Control and Monitoring Systems

Training available for: SIMATIC WinCC Unified in TIA Portal, SIMATIC WinCC in TIA Portal, SIMATIC WinCC V7x

##### Motion Control System SIMOTION

Training available for: SIMOTION (Programming, Commissioning, Diagnostics, Service)

##### Smart Infrastructure

Training available for: SIRIUS, SENTRON, SIVACON, ALPHA, SIMOCODE, Circuit breakers

##### Process Analytics & Instrumentation

Training is available for process analytics and instrumentation, explosion protection, process gas chromatographs

##### Additional training offer

SIMOVE with Automated Guided Vehicles (AGV), SIPLUS CMS, Guidelines and standards for control cabinets

### Introduction

#### **Different learning formats and methods for maximum learning success**

Face-to-face training in the training center or in the virtual classroom, with fixed dates and course times, learning in a group with a learning guide? Or digital training, on your own responsibility and location-independent, on demand, 24/7?

With the learning formats "Learning Journey", "Learning Membership" and "Learning Event", SITRAIN offers a wide range of different learning options in connection with didactically effective methods and modular possibilities.

#### **Learning Journey**

The combination for sustainable learning success

- The optimal mix of self-study units and guided live modules
- Includes a Learning Membership to work through the self-study modules and access on-demand content
- The SITRAIN learning consultant is available for questions and one-on-one consultations
- Ideal integration into the daily work routine and adaptation to one's own learning pace.

#### **Learning Membership**

Securing knowledge through continuous learning on your own responsibility

- With access to the comprehensive and constantly growing range of self-study units on SITRAIN access, the digital learning platform
- Search and find specific learning content or simply have a look around – anytime and anywhere
- A modern learning culture through continuous learning on your own responsibility and transparency about your learning success in the team or company.

#### **Learning Event**

Acquire theoretical and practical knowledge in a compact and guided format

- You achieve a defined learning goal in the shortest possible time
- The learning consultant guides you through the practical exercises and is also exclusively available to you during the theoretical sessions for the entire duration
- Focused learning, outside of the daily work routine, in a protected learning environment – virtually, in the training center, or at your company.

#### **Live**

Learn together with others, simultaneously and guided by a learning consultant. Online, in the SITRAIN training center or at your company.

#### **Self-reliant**

Expand your knowledge self-determined with industry learning and work on your learning units at your own pace and according to your own schedule.

#### **On demand**

Get the knowledge you need, exactly when you need it. Be it to answer a current question or to work on a special topic.

#### **Individuell**

Talk directly with the learning consultant, clarify detailed questions and get personal coaching for transferring the learned topics to your own application.

#### **Training cases catalog**

<https://www.siemens.com/sitrain-catalog-training-cases>

Find  
your local  
offer here

#### **SITRAIN – Digital Industry Academy worldwide**

You will find the regional knowledge offer in the country selection. One click will take you to the corresponding website.

<b>SINAMICS S200 training case</b> Scope of delivery: <ul style="list-style-type: none"> <li>• 2 × SINAMICS S200 servo converter, PROFINET version, 200 V, 100 W</li> <li>• 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn</li> <li>• 1 × SIMOTICS S-1FL2 Low Inertia servomotor, absolute encoder 21-bit singleturn + 12-bit multiturn</li> <li>• 2 × Pre-assembled dual motor connection cable</li> <li>• Rail, prepared for installation of a controller, e.g. SIMATIC S7-1500 (controller not included in scope of delivery)</li> </ul> The SINAMICS S200 training case is supplied as a trolley with a hood.	<b>6AG1067-1AA42-0AA0</b>

### Overview

Our understanding of an application is the customer-specific solution of an automation task based on standard hardware and software components. In this respect, industry knowledge and technological expertise are just as important as expert knowledge about how our products and systems work. We are setting ourselves this challenge with more than 280 application engineers in 20 countries.

#### Application centers

We currently have application centers in:

- Germany: Head Office in Erlangen and in other German regions, e.g. in Munich, Nuremberg, Stuttgart, Mannheim, Frankfurt, Chemnitz, Cologne, Bielefeld, Bremen, Hanover, Hamburg
- Belgium: Brussels
- Brazil: Sao Paulo
- China: Beijing and 12 regions
- Denmark: Ballerup
- France: Paris
- Great Britain: Manchester
- India: Mumbai
- Italy: Bologna, Milan
- Japan: Tokyo, Osaka
- The Netherlands: The Hague
- Austria: Vienna
- Poland: Warsaw
- Sweden: Göteborg
- Switzerland: Zurich, Lausanne
- Spain: Madrid
- South Korea: Seoul
- Taiwan: Taipei
- Turkey: Istanbul
- USA: Atlanta

These application centers specialize in the use of SIMATIC/SIMOTION/SINAMICS. You therefore can rely on automation and drive specialists for implementing successful applications. By involving your personnel at an early stage in the process, we can provide a solid basis for rapid knowledge transfer, maintenance and further development of your automation solution.

#### Advice on applications and implementation

We offer a variety of consultation services to help you find the optimum solution for the SIMATIC/SIMOTION/SINAMICS application you want to implement:

The quotation phase includes

- clarification of technical questions,
- discussion of machine concepts and customer-specific solutions,
- selection of suitable technology and
- suggestions for implementation.

A technical feasibility study is also performed at the outset. In this way, difficult points of the application can be identified and solved early on. We can also configure and implement your application as a complete solution from a single source.

A large number of proven standard applications are available for use during the implementation phase. This saves engineering costs.

The system can be commissioned by experienced, competent personnel, if required. This saves time and trouble.

If servicing is required, we can support you on site or remotely. For further information about servicing, please see the section "Industry Services".

#### On-site application training

Training for the implemented applications can also be organized and carried out on site. This training for machine manufacturers and their customers does not deal with individual products, but the entire hardware and software system (for example, automation, drives and visualization).

From an initial concept to successful installation and commissioning: We provide complete support for SIMATIC/SIMOTION/SINAMICS! Contact your Siemens representative.

You can find further information at [www.siemens.com/machinebuilding](http://www.siemens.com/machinebuilding)

## Services and documentation

### mySupport documentation

#### Overview

### mySupport documentation – Compiling personal documents

mySupport documentation is a web-based system for generating personalized documentation based on standard documents and is part of the Siemens Industry Online Support portal.

In mySupport, a personal document library can be created in the "Documentation" category. This library can be accessed online in mySupport or also be generated in various formats for offline use.

Previously, this functionality was available in the My Documentation Manager for configurable manuals. Due to the integration in mySupport, all entries of the Industry Online Support can now be imported into the personal document library, including FAQs or product notifications.

If you have already worked with the My Documentation Manager, all of the previously created libraries will continue to be available without restrictions in mySupport.

In addition, the personal library in mySupport can be shared with other mySupport users. In this way, a collection of relevant documents can be created very effectively and used together with other mySupport users all over the world.

You must register/log in for configuring and generating/managing.

#### Benefits

- Display  
View, print or download standard documents or personalized documents
- Configure  
Transfer standard documents or parts of them to personalized documents
- Generate/Manage  
Generate and manage personalized documents in the formats PDF, RTF or XML in all available languages

#### Function

##### Opening mySupport documentation in the Industry Online Support portal

- Via the product support, entry type "Manual":  
<https://support.industry.siemens.com/cs/ww/en/ps/manual>  
By clicking on the required version of the manual and then "Show and configure", the manual opens in a modular view, where you can navigate from topic to topic. Here the direct link to a topic can be used and made available to other users. The selected document can be added to the personal library via "mySupport Cockpit" > "Add to mySupport documentation".
- Via the direct link  
<https://support.industry.siemens.com/my/ww/en/documentation/advanced>  
After logon/registration, the online help is displayed as the current document.

#### More information

You can find additional information on the internet at

- <https://support.industry.siemens.com/my/ww/en/documentation>
- [https://support.industry.siemens.com/cs/helpcenter/en/index.htm?#persoenliche\\_bibliothek\\_aufbauen.htm](https://support.industry.siemens.com/cs/helpcenter/en/index.htm?#persoenliche_bibliothek_aufbauen.htm)

## Overview

A high-quality programmable control or drive system can be used to maximum effect only if the user is aware of the performance of the products used as a result of intensive training and good technical documentation.

This is becoming more important due to the shorter innovation cycles of modern automation products and the convergence of electronics and mechanical engineering.

A comprehensive range of documentation is available which includes a Getting Started guide, operating instructions, installation manuals and a list manual.

The documents are available in hardcopy form or as a PDF file for downloading from the internet.

Information and documentation relating to SINUMERIK, SINAMICS, SIMOTION and SIMOTICS are available on the internet at <https://support.industry.siemens.com/cs/document/109476679>

## Application

### *Explanations of the manuals:*

- **Operating Instructions**  
contain all the information needed to install the device and make electrical connections, information about commissioning and a description of the converter functions.  
Phases of use: Control cabinet construction, commissioning, operation, maintenance and servicing.
- **Hardware Installation Manual**  
contains all relevant information about the intended use of the components of a system (technical specifications, interfaces, dimensional drawings, characteristics, or possible applications), information about installation and electrical connections and information about maintenance and servicing.  
Phases of use: Control cabinet configuration/construction, maintenance and servicing.
- **Operating and Installation Instructions**  
(for converter and accessories)  
contain all relevant information about the intended use of the components, such as technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.  
Phases of use: Control cabinet configuration/construction.
- **Manual/Configuration Manual**  
contains all necessary information about the intended use of the components of a system, e.g. technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.  
Phases of use: Cabinet configuration/setup, circuit diagram configuration/drawing.
- **Commissioning Manual**  
contains all information relevant to commissioning after installation and wiring. It also contains all safety and warning notices relevant to commissioning in addition to overview drawings.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions.
- **List Manual**  
contains all parameters, function diagrams, and faults/alarms for the product/system as well as their meanings and setting options. It contains parameter data and fault/alarm descriptions with functional correlations.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions, fault cause/diagnosis.
- **Getting Started**  
provides information about getting started for the first-time user as well as references to additional information. It contains information about the basic steps to be taken during commissioning. The information in the other documentation should be carefully observed for all of the other work required.  
Phases of use: Commissioning of components that have already been connected.
- **Function Manual Drive Functions**  
contains all the relevant information about individual drive functions: Description, commissioning and integration in the drive system.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions.

#### SINAMICS S200 documentation

##### Overview

Identification link according to IEC 61406 for SINAMICS S200

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s200/documentation](http://www.siemens.com/sinamics-s200/documentation)

Detailed information on the SINAMICS S200 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s200](http://www.siemens.com/sinamics-s200)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s200/configuration](http://www.siemens.com/sinamics-s200/configuration)

## Appendix

7/2	Certificates of suitability
7/4	Software licenses
7/6	Conversion tables
7/8	Metal surcharges
7/11	Conditions of sale and delivery

## Appendix

### Certificates of suitability

#### Overview

Many of the products in this Catalog fulfill requirements, e.g. for UL, CSA or FM and are labeled with the corresponding approval designation.

All of the certificates of suitability, approvals, certificates, declarations of conformity, test certificates, e.g. CE, UL, Safety Integrated etc. have been performed with the associated system components as they are described in the Catalogs and Configuration Manuals.

The certificates are only valid if the products are used with the described system components, are installed according to the Installation Guidelines and used for their intended purpose.

In other cases, the vendor of these products is responsible for arranging for the issue of new certificates.

## Appendix

### Software licenses

#### Overview

##### Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

##### Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing.

Data generated with engineering software and executable programs can be duplicated for your own use or for use by third-parties free-of-charge.

##### Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.

The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge.

You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.

Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of supply can be found in the readme file supplied with the relevant product(s).

##### License types

Siemens Industry Automation & Drive Technologies offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

##### Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. A license is required for each concurrent user.

##### Single license

Unlike the floating license, a single license permits only one installation of the software per license.

The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc.

One single license is required for each type of use defined.

##### Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive).

One license is required for each installation of the software.

##### Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

##### Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

##### Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

##### Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

##### Delivery versions

Software is constantly being updated. The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

##### PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

##### Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

## Overview

### **ServicePack**

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

### **License key**

Siemens Industry Automation & Drive Technologies supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

### **Software Update Service (SUS)**

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Metal surcharges

#### Explanation of the raw material/metal surcharges <sup>1)</sup>

##### Surcharge calculation

To compensate for variations in the price of the raw materials silver, copper, aluminum, lead, gold, dysprosium<sup>2)</sup> and/or neodym<sup>2)</sup>, surcharges are calculated on a daily basis using the so-called metal factor. These apply to products containing these raw materials and are calculated per raw material. These surcharges are added to the price of a product if the basic official price (BOP) of the raw material in question is exceeded. Surcharges are calculated in accordance with the following criteria:

##### Basic official price (BOP) of the raw material

- BOP of the workday prior to receipt of the order or prior to release order (Daily Price) for:
  - Silver (processed)<sup>3)</sup>
  - Gold (processed)<sup>3)</sup>
  - Aluminum (temporary constant 360.31 EUR per 100 kg, due to loss of DEL-Notiz)
  - Lead (constant 199.50 EUR per 100 kg)
- BOP of two workdays prior to receipt of the order or prior to release order (Daily Price) per 100 kg for:
  - Copper (LME-notation/10, converted from USD to EUR using LME-FX-Rate [MTLE] + 1.2%) + 1%<sup>4)</sup>
- If BOP is suspended, the last one is used.

##### Metal factor of the products

Certain products are displayed with a metal factor. The metal factor determines the official price (for those raw materials concerned) as of which the metal surcharges are applied and the calculation method used (weight or percentage method). An exact explanation is given below.

##### Structure of the metal factor

Metal factor consists of several digits; the first digit indicates whether the percentage method of calculation refers to the list price or a discounted price (customer net price) (L = list price / N = customer net price).

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG)
3rd digit	for copper (CU)
4th digit	for aluminum (AL)
5th digit	for lead (PB)
6th digit	for gold (AU)
7th digit	for dysprosium (Dy) <sup>2)</sup>
8th digit	for neodym (Nd) <sup>2)</sup>

##### Weight method

The weight method uses the BOP, the daily price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the daily price. The difference is then multiplied by the raw material weight.

The BOP can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. The raw material weight can be found in the respective product descriptions.

##### Percentage method

Use of the percentage method is indicated by the letters A-Z at the respective digit of the metal factor.

The surcharge is increased - dependent on the deviation of the daily price compared with the BOP - using the percentage method in "steps" and consequently offers surcharges that remain constant within the framework of this "step range". A higher percentage rate is charged for each new step. The respective percentage level can be found in the table below.

##### Metal factor examples

###### LEA-----

Basis for % surcharge: List price  
 Silver Basis 150 €, Step 50 €, 0.5 %  
 Copper Basis 150 €, Step 50 €, 0.1 %  
 No surcharge for aluminum  
 No surcharge for lead  
 No surcharge for gold  
 No surcharge for dysprosium  
 No surcharge for neodym

###### N-A6-----

Basis for % surcharge: Customer net price  
 No surcharge for silver  
 Copper Basis 150 €, Step 50 €, 0.1 %  
 Aluminum acc. to weight, basic offic. price 225 €  
 No surcharge for lead  
 No surcharge for gold  
 No surcharge for dysprosium  
 No surcharge for neodym

###### --3-----

No basis necessary  
 No surcharge for silver  
 Copper acc. to weight, basic official price 150 €  
 No surcharge for aluminum  
 No surcharge for lead  
 No surcharge for gold  
 No surcharge for dysprosium  
 No surcharge for neodym

1) Refer to the separate explanation on the next page regarding the raw materials dysprosium and neodym (= rare earths).

2) For a different method of calculation, refer to the separate explanation for these raw materials on the next page.

## Explanation of the raw material/metal surcharges for dysprosium and neodym (rare earths)

### Surcharge calculation

To compensate for variations in the price of the raw materials silver <sup>1)</sup>, copper <sup>1)</sup>, aluminum <sup>1)</sup>, lead <sup>1)</sup>, gold <sup>1)</sup>, dysprosium and/or neodym, surcharges are calculated on a daily basis using the so-called metal factor. This applies to products containing at least one of these raw materials. The surcharge for dysprosium and neodym is calculated as a supplement to the price of a product if the basic official price (BOP) of the raw material in question is exceeded.

The surcharge is calculated in accordance with the following criteria:

- Basic official price (BOP) of the raw material <sup>2)</sup>  
Three-month basic average price (see below) in the period before the quarter in which the order was received or the release order took place (average official price) for
  - Dysprosium (Dy metal, 99 % min. FOB China; USD/kg)
  - Neodym (Nd metal, 99 % min. FOB China; USD/kg)
- Metal factor of the products  
Certain products are displayed with a metal factor. The metal factor indicates (for those raw materials concerned) the BOP as of which the surcharges for dysprosium and neodym are calculated using the weight method. An exact explanation of the metal factor is given below.

### Three-month average price

The prices of rare earths vary according to the foreign currency, and there is no freely accessible stock exchange listing. This makes it more difficult for all parties involved to monitor changes in price. In order to avoid continuous adjustment of the surcharges, but to still ensure fair, transparent pricing, an average price is calculated over a three-month period using the average monthly foreign exchange rate from USD to EUR (source: European Central Bank). Since not all facts are immediately available at the start of each month, a one-month buffer is allowed before the new average price applies.

Examples of calculation of the average official price:

Period for calculation of the average price:	Period during which the order/release order is effected and the average price applies:
Sep 2012 - Nov 2012	Q1 in 2013 (Jan - Mar)
Dec 2012 - Feb 2013	Q2 in 2013 (Apr - Jun)
Mar 2013 - May 2013	Q3 in 2013 (Jul - Sep)
Jun 2013 - Aug 2013	Q4 in 2013 (Oct - Dec)

### Structure of the metal factor

The metal factor consists of several digits; the first digit is not relevant to the calculation of dysprosium and neodym.

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG) <sup>1)</sup>
3rd digit	for copper (CU) <sup>1)</sup>
4th digit	for aluminum (AL) <sup>1)</sup>
5th digit	for lead (PB) <sup>1)</sup>
6th digit	for gold (AU) <sup>1)</sup>
7th digit	for dysprosium (Dy)
8th digit	for neodym (Nd)

### Weight method

The weight method uses the basic official price, the average price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the average price. The difference is then multiplied by the raw material weight.

The basic official price can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. Your Sales contact can inform you of the raw material weight.

### Metal factor examples

1) For a different method of calculation, refer to the separate explanation for these raw materials on the previous page.

## 1. General Provisions

By using this catalog you can purchase hard- and software products as well as services (together hereinafter referred to as "products") described therein from Siemens Aktiengesellschaft subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Note, for products purchased from any Siemens entity having a registered office outside of Germany, the respective terms and conditions of sale and delivery of the respective Siemens entity apply exclusively. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

### 1.1 For customers with a seat or registered office in European Union

For customers with a seat or registered office in European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the text of the product description, these specific terms and conditions shall apply and subordinate thereto,,
- for stand-alone software products and software products forming a part of a product or project, the "General Conditions for Software Products for Infrastructure & Industry Business (German law)"<sup>1)</sup> and/or
- for consulting services the "Allgemeine Geschäftsbedingungen für Beratungsleistungen für Infrastructure & Industry Geschäft (Deutsches Recht)"<sup>1)</sup> (available only in German) and/or
- for other services, the „Supplementary Terms and Conditions for Services for Infrastructure & Industry Business (German Law) ("BL")"<sup>1)</sup> and/or
- for other products the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>.  
In case such products should contain Open Source Software, the conditions of which shall prevail over the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>, the Product will be given a note as to which special conditions apply to this open source software. This shall apply mutatis mutandis for notices referring to other third-party software components.

### 1.2 For customers with a seat or registered office outside European Union

For customers with a seat or registered office outside European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for consulting services the "Standard Terms and Conditions for Consulting Services for Infrastructure & Industry Business (Swiss Law)"<sup>1)</sup> and/or
- for other services the "International Terms & Conditions for Services"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup> and/or
- for other products the "International Terms & Conditions for Products"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup>

### 1.3 For customers with master or framework agreement

To the extent products offered are covered by an existing master or framework agreement, the terms and conditions of that agreement shall apply instead of T&C.

## 2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials.

A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation. The metal factor, provided it is relevant, can be found in the respective product description.

You will find a detailed explanation of the metal factor on the page headed "Metal surcharges".

To calculate the surcharge (except in the cases of copper, dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to copper, the official price from two days prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

## 3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog – especially with regard to data, dimensions and weights given – these are subject to change without prior notice.

<sup>1)</sup> The text of the Terms and Conditions of Siemens AG can be downloaded at  
[https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Conditions of sale and delivery

#### 4. Export Control and Sanctions Compliance

##### 4.1 General

Customer shall comply with all applicable sanctions, embargoes and (re-)export control laws and regulations, and, in any event, with those of the European Union, the United States of America and any locally applicable jurisdiction (collectively "Export Regulations").

##### 4.2 Checks for Products

Prior to any transaction by customer concerning products (including hardware, documentation and technology) delivered by Siemens, or products (including maintenance and technical support) performed by Siemens with a third party, customer shall check and certify by appropriate measures that

- (i) the customer's use, transfer, or distribution of such products, the brokering of contracts or the provision of other economic resources in connection with products will not be in violation of any Export Regulations, also taking into account any prohibitions to circumvent these (e.g., by undue diversion)
- (ii) the products are not intended or provided for prohibited or unauthorized non-civilian purposes (e.g. armaments, nuclear technology, weapons, or any other usage in the field of defense and military);
- (iii) customer has screened all direct and indirect parties involved in the receipt, use, transfer, or distribution of the products against all applicable restricted party lists of the Export Regulations concerning trading with entities, persons and organizations listed therein and
- (iv) products within the scope of items-related restrictions, as specified in the respective annexes to the Export Regulations, will not, unless permitted by the Export Regulations, be
  - (a) exported, directly or indirectly (e.g., via Eurasian Economic Union (EAEU) countries), to Russia or Belarus, or
  - (b) resold to any third party business partner that does not take a prior commitment not to export such products to Russia or Belarus.

##### 4.3 Non-Acceptable Use of Software and Cloud Services

Customer shall not, unless permitted by the Export Regulations or respective governmental licenses or approvals,

- (i) download, install, access or use the products from or in any location prohibited by or subject to comprehensive sanctions or subject or to license requirements according to the Export Regulations;
  - (ii) grant access to, transfer, (re-)export (including any "deemed (re-)exports"), or otherwise make available the products to any entity, person, or organization identified on a restricted party list of the Export Regulations;
  - (iii) use the products for any purpose prohibited by the Export Regulations (e.g. use in connection with armaments, nuclear technology or weapons);
  - (iv) upload to a products platform any customer content unless it is non-controlled (e.g. in the EU: AL = N; in the U.S.: ECCN = N or EAR99);
  - (v) facilitate any of the afore mentioned activities by any user.
- Customer shall provide all users with all information necessary to ensure compliance with the Export Regulations.

##### 4.4 Semiconductor Development

Customer will not, without advance written authorization from Siemens, use offerings for the development or production of integrated circuits at any semiconductor fabrication facility located in China meeting the criteria specified in the U.S. Export Administration Regulations, 15 C.F.R. 744.23.

##### 4.5 Information

Upon request by Siemens, customer shall promptly provide Siemens with all information pertaining to users, the intended use and the location of use or the final destination (in the case of hardware, documentation and technology) of the products. Customer will notify Siemens prior to customer disclosing any information to Siemens that is defense-related or requires controlled or special data handling pursuant to applicable government regulations, and will use the disclosure tools and methods specified by Siemens.

##### 4.6 Reservation

Siemens shall not be obligated to fulfill this agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions. Customer acknowledges that Siemens may be obliged under the Export Regulations to limit or suspend access by customer and/or users to products.

#### 5. Miscellaneous

Errors excepted and subject to change without prior notice.

# Selection and ordering at Siemens SiePortal – Ordering products and downloading catalogs

## Easy product selection and ordering with SiePortal

### SiePortal > Products & Services

The internet ordering platform of Siemens AG is located in SiePortal. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAX data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

<https://sieportal.siemens.com>

## Downloading catalogs

### SiePortal > Support > Knowledge base

You can download catalogs and brochures in PDF format from Siemens Industry Online Support without having to register.

The filter box makes it possible to perform targeted searches.

<https://sieportal.siemens.com>

### Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.
